## Yadkin-Fentress 500 kV Electric Transmission Line Project

At Dominion Energy, we provide the reliable, affordable, and increasingly clean energy that powers your every day. We are replacing 13.5 miles of an existing 500 kilovolt (kV) transmission line with two 500 kV lines between our Yadkin and Fentress substations in the City of Chesapeake, Virginia. This project will maintain reliability of the transmission system and integrate new electric generation with the grid.

We are reaching out to inform you of lighting that will be installed on new electric transmission poles between Scenic Parkway and Washington Drive.

The Federal Aviation Administration (FAA) requires obstruction lighting fixtures be installed on the transmission poles due to their proximity to the Chesapeake Regional Airport and their height. The new structure heights will range from 187 feet to 192 feet tall.

We appreciate your patience while we complete this work as quickly and efficiently as possible. We expect to finish construction in this section in spring 2026, and we will restore the right of way with grass, low-growth vegetation, or wetland species. Please do not hesitate to connect with us if you have questions.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at [powerlines101.dominionenergy.com](http://powerlines101.dominionenergy.com).

## LIGHT INSTALLATION

One at top of pole

If required, two at mid-height of pole

All red lights will flash 30 times per minute

Required by FAA Regulation  
(AC 70/7460-1M, CHG 1, Appendix A, A-1)

FAA  
Regulation
