We are working in your community

Yadkin-Fentress 500 kV Electric Transmission Line Project

At Dominion Energy, we provide the reliable, affordable, and increasingly clean energy that powers your every day. You may notice upcoming transmission line activities that will be completed by helicopter.

MORE

We will begin removing existing wires in November 2025. Between January and March 2026, a non-Dominion Energy helicopter will help install new transmission lines and communication fiber on the transmission poles between West Road and Holmes Trail in the City of Chesapeake, Virginia.

The work will occur Monday to Saturday, between 8:30 a.m. and 5:00 p.m. Flights are weather-dependent and subject to change. To ensure everyone's safety, temporary traffic interruptions will occur (less than five minutes at a time) when the helicopter pulls lines over the road. Traffic signs will be posted and flaggers or police will be present to temporarily stop traffic. Spotters will also be present on adjacent sidewalks and shared use paths.

For neighbors who reside near the work zone - we respectfully remind you to remain outside the right of way during overhead work. Safety is our highest priority, and this is an active construction zone. Safety perimeters serve as reminders of the work zone boundaries and help keep you safe while we work overhead.

Thank you for your patience while we complete this work as quickly and efficiently as possible. Construction near you will end in spring 2026, and we will restore the right of way with grass, low-growth vegetation, or wetland species. Please do not hesitate to connect with us if you have questions.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
