Yadkin Substation Expansion Project

Dominion Energy is committed to letting you know about work near you. To help reliably deliver new power generation to the electric grid, new equipment will be installed at the existing Yadkin Substation. The substation will expand by approximately 1.1 acres on Dominion Energy-owned property.

Part of this work will expand the existing substation fence to accommodate new 500 kilovolt (kV) equipment. This project will also relocate an existing 500 kV transmission line from one part of the substation to another. These equipment shifts allow a newly constructed 500 kV transmission line from Yadkin Substation to safely connect.

MORE

Construction is planned between September 2025 and December 2026. Work may occur Monday to Saturday between 7:00 a.m. and dusk. This fall, you may notice increased construction vehicle traffic using the existing driveway entrance from Yadkin Road across the railroad tracks.

Thank you for your patience while our crews work to provide safe, reliable, and increasingly clean energy to you and your community

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
