Zeus 230kV Electric Transmission Project and Community Meetings

Dear Neighbor,

At Dominion Energy, we are committed to providing the reliable, affordable and increasingly clean energy that powers your every day. New electric infrastructure is needed to support recent economic development, and increased energy demands in the Piedmont region. As such, the proposed Zeus 230 Kilovolt (kV) Electric Transmission Project will build a 230kV double-circuit transmission line to connect existing infrastructure in the Farmville area to proposed infrastructure in the Appomattox area. This project will also support continued reliability and operational flexibility throughout the electric grid.

This project includes the following key components:

1. A new substation to reinforce the electric distribution network.
2. A new, double-circuit 230 kV transmission line and new right of way corridor to connect the new substation to the existing electric transmission grid.

The project is currently in the conceptual stage, and the team is reviewing all electrical and construction options. No routes have been finalized; however, preliminary routes have been identified [see enclosure]. As you know, public engagement is a key part of the electric transmission planning process, and community feedback will help refine our conceptual plans. You are invited to a community meeting to provide initial input on the new right of way and potential routes:

Community Meeting #1: Appomattox

Thursday, November 5, 2026
5-7 p.m.

Appomattox Community Center
220 Community Lane
Appomattox, VA 24522

During the community meeting, you can review the preliminary routing options, learn more about the project and speak with team members. There will be no formal presentation.

After applying your feedback and evaluating all routing options, an application will be filed with the Virginia State Corporation Commission (SCC) in early 2027 with one proposed route and alternatives. If approved, the SCC will determine which one route will be selected for Dominion Energy to construct.

Please note, this is the first of multiple meetings and more information will be sent in the coming weeks. In the meantime, you can view information on the project website, DominionEnergy.com/Zeus. You can also contact the project team by email at powerline@dominionenergy.com or by phone at 888-291-0190.

Thank you for helping to plan for long-term reliability investments in your community.

Sincerely,

A handwritten signature in black ink that reads "Janae Johnson". The signature is fluid and cursive, with the first name "Janae" and last name "Johnson" clearly distinguishable.
