RATE 55 **INTERRUPTIBLE TRANSPORTATION SERVICE**

AVAILABILITY

Interruptible transportation service may be offered to a large commercial or industrial Customer that has obtained an independent supply of Gas, has made arrangements to have Gas delivered to the Company at an acceptable point of connection through an authorized pooler designated by the Customer, for delivery by the Company to the Customer's regular point of service, and has made accommodation for the installation of telemetry for the purpose of daily measurement readings. All transportation under this rate schedule is provided in accordance with the Company's Transportation Pooling Agreement, as it may be revised from time to time.

RATE PER MONTH

Transportation Service

Basic Facilities Charge	**$600.00**	per Month
Energy Charge	**$1.12366**	per Dekatherm

Once a qualified Customer elects service under this rate schedule, service will be provided for a term extending through the following September 30. Subject to the consent of the Company, the Customer may elect to discontinue service under this rate schedule and receive service from Rate 54 by giving written notice to the Company prior to July 1 of any year. The Company will grant such consent if it has, or is able to acquire under commercially reasonable terms and conditions, the necessary Gas supplies and capacity to provide service to the Customer under Rate 54. Proper notice having been provided and consent obtained, the Customer shall discontinue service under this rate schedule effective the following October 1.

All Gas transported under this rate schedule shall be measured separately from Gas purchased or transported under any other rate schedule. Neither separate accounts nor separate locations may be combined to qualify for the minimum quantity provision of this rate schedule.

Company may refuse service under this rate schedule if Company determines that:

1) it does not have Gas delivery capacity in excess of the requirements of its other existing Customers; or
2) the requested service would require an uneconomic enlargement or extension of Company's facilities.

Service under this rate schedule is subject to review and possible reclassification to a different rate schedule.

MINIMUM CHARGE

The monthly minimum charge shall be the basic facilities charge as determined above. The basic facilities charge will be waived in any month when the Company is unable to deliver any Gas during that billing month.

BALANCING OF TRANSPORTATION QUANTITIES

At any time when the Customer is consistently using more or less Gas than is being delivered to the Company for the Customer's account, it shall be the Customer's or its agent’s responsibility to bring its supply and requirements into balance in accordance with the Company's Transportation Pooling Agreement, as it may be revised from time to time. The Customer, the Customer’s agent, and the Company shall strive to keep the transportation quantities within a reasonable operating balance at all times. The Customer or its agent shall notify Company immediately in the event of increases or reductions in the quantity of Gas being transported.

INABILITY TO OBTAIN INDEPENDENT SUPPLY OF GAS

In the event the Customer is unable to obtain its independent supply of Gas, the Company may, at its sole discretion, supply Gas to the Customer. The energy charge for such Gas will be the Rate 54 energy charge; provided that, when the Company is required to purchase incremental quantities of Gas to accommodate the Customer’s supply requirements, the energy charge shall be calculated on a daily basis as the higher of: (a) the Rate 54 energy charge or (b) the sum of the daily commodity cost of Gas supplied and the Rate 55 Transportation Charge. The daily commodity cost of Gas shall be the absolute high price for the day of consumption as published in Gas Daily in the “Daily price survey,” “Citygates,” “Transco, zone 5 delivered,” Absolute,” high end of the range. For days of consumption when Gas Daily is not published, the daily price published by Gas Daily on the nearest subsequent day shall be used.

RATE 55 **INTERRUPTIBLE TRANSPORTATION SERVICE**

CURTAILMENT

Although not required to maintain alternate fuel capability in order to receive service under this rate schedule, the customer exclusively bears all business, operational, mechanical, or other risks associated with the interruption or curtailment of service. The Company may require curtailment of service for any reason it deems necessary or appropriate. The customer must be capable of being 100% curtailed on two hours' notice. In case of non-compliance with a curtailment order, the Company shall have the right to valve off Service when necessary, in the Company's sole opinion, to protect service to higher margin customers.

Notice of a curtailment is effective when issued through the Company's electronic communication system. The customer shall provide the Company with the names, titles, telephone numbers, and email addresses of at least two representatives authorized by the Customer to receive curtailment notices and shall promptly notify the Company of any changes to such information.

EMERGENCY GAS AND UNAUTHORIZED GAS

Emergency Gas and unauthorized gas shall be billed as set forth in the Company's General Terms and Conditions.

SALES AND FRANCHISE TAX

To the above will be added any applicable sales tax, franchise fee or business license tax which may be assessed by any state or local governmental body.

PAYMENT TERMS

All bills are net and payable when rendered.

TRANSPORTATION POOLING AGREEMENT

The Company's Transportation Pooling Agreement is incorporated by reference and is a part of this rate schedule.

GENERAL TERMS AND CONDITIONS

The Company's General Terms and Conditions are incorporated by reference and are a part of this rate schedule.
