III. DETERMINATION OF DISTRIBUTION DEMAND

The Distribution Demand shall be billed only where the service voltage is less than 69 kV. The kW of demand billed under II.A.2. shall be the highest of:

- A. The highest average kW measured in any 30-minute interval during the current and preceding eleven billing months.
- B. 50 kW.
- C. For existing Customers served on this schedule where a minimum demand has not been contracted for but an increase in capacity has been requested and where the projected kW load is estimated to exceed 500 kW, the minimum demand shall not be less than 70% of the kVA capacity of the normal service transformer required to serve the Customer's projected load.
- D. For Customers served prior to January 1, 2022, and where there presently is a contracted minimum demand, the Customer will have the option to either (i) continue at the contracted minimum demand level until such time as the existing normal service transformer(s) requires replacement due to Customer load growth, at which time the minimum demand will be set per III. C., above, or (ii) immediately set the contract minimum demand per III. C., above.
- E. At the Customer's request, after 12 months of active service, in lieu of III.C. or III.D. above, the Customer has the option to execute an Agreement for Electric Service and pay a Monthly Facilities Charge for any excess facilities in accordance with Section IV.E. of the Terms and Conditions. 3. 50 kW.

B. Where the kW of demand determined under V.A. is 1,000 kW or more, the kW of demand billed under Paragraph II.B.1. shall be the highest of:
