

Eric Carr
Chief Nuclear Officer and President–Nuclear Operations and Contracted Energy

Eric Carr is chief nuclear officer and president–Nuclear Operations and Contracted Energy.

He oversees the operations of the company’s seven nuclear units in three states and Contracted Energy, consisting of Millstone Power Station, and long-term contracted solar generation assets, and a renewable gas portfolio.

Carr joined Dominion Energy in 2023 as chief nuclear officer and president-Nuclear Operations. He assumed his current role in January 2025.

Prior to joining the company, Carr was president and chief nuclear officer of PSEG Nuclear, where he oversaw operations for the Hope Creek and Salem nuclear generating stations in Salem County, N.J., including 1,600 employees and nearly 3,500 MW of total capacity. Before becoming chief nuclear officer, he was vice president-Hope Creek Generating Station and acting vice president and plant manager-Salem Generating Station. He received his senior reactor operating license while at Peach Bottom Nuclear Generating Station in York County, Pa.

Carr was appointed by the Governor’s office to serve on the board of the Virginia Nuclear Energy Consortium Authority in 2024.

Carr earned a bachelor’s degree in engineering from the University of Delaware and his master’s of business administration degree from Widener University.
