RE: Dominion Energy West Loop Project, Docket Number CP19-26-000

Dear Secretary Bose:

I write this letter in full support of Dominion Energy's West Loop Project in Western Pennsylvania. As a State Representative whose district encompasses Lawrence County, I believe that this project will bring the positive economic impacts that have been witnessed from the expansion of Marcellus and Utica Shale extraction to a new market in the state that is primed for the opportunity.

The proposed West Loop Project will consist of five miles of looping pipeline beginning in Beaver County and will add automation and control valves at its Old Petersburg Regulation Junction facility, which is located in my legislative district. These upgrades will assist in meeting the natural gas demands of our citizens. Just as importantly, this project will create jobs and spur economic growth in a region that has been hit hard by the decline of the coal and steel industries, which means improving the lives of determined and hardworking Pennsylvanians and their families. I wholeheartedly feel it is vital replace jobs from fading industries with high-quality jobs of the future such as these.

I give my full support to Dominion Energy's West Loop Project and urge the Federal Energy Commission to approve this job and energy creating project.

Sincerely,

Chris Sainato  
State Representative  
PA 9<sup>th</sup> Legislative District
