

## 2022 Hurricane Predictions

-- transcript --

Hurricane season has arrived and we're expecting above average activity this year.

Here in the Dominion Energy weather center we closely monitor storms that may impact our customers year round but especially during hurricane season.

Our crews are preparing by making necessary repairs to equipment, strengthening our system and clearing trees and tree limbs away from power lines.

It's important for South Carolina, North Carolina and Virginia customers to prepare for storms now versus under the pressure of an approaching storm. The best way you can prepare is by putting together or restocking your emergency kits, creating a plan for you and your family and downloading the Dominion Energy app.

Customers can monitor the outage map for status updates as they become available while our crews work hard to get the lights back on.

After a storm our dedicated crews will work around the clock to restore service as safely and quickly as possible.

Actions Speak Louder
