

EV NARRATION

It would be nice to not have to stop and get gas on the way to work. People in their EV never have to worry about that ...I wonder what other benefits there are to owning an EV.

Wow. Not only is an EV less expensive over time, but my carbon footprint would be much smaller. I wouldn't need to bring my car in for oil changes or general maintenance, and I can charge it at home! I will never have to stop at a gas station again!and when I go on a long distance road trip there are lots of locations to quickly charge up while I stretch my legs and grab a snack or coffee.
