

00:00:00:00 - 00:00:04:15

Welcome to the panel Wiring Shop  
Project Virtual Open House.

00:00:05:03 - 00:00:08:18

My name is Ian Wright  
and I manage communications for electric

00:00:08:18 - 00:00:12:06

transmission projects in Loudoun County  
for Dominion Energy.

00:00:13:02 - 00:00:16:02

I'd like to thank you all for joining us  
today.

00:00:16:03 - 00:00:19:11

The Q&A function will be available  
throughout the presentation.

00:00:19:23 - 00:00:22:20

Please feel free to extra questions there.

00:00:22:20 - 00:00:25:11

We will categorize the questions  
and we will answer

00:00:25:11 - 00:00:28:23

as many as we can  
in the time that we have available today.

00:00:29:11 - 00:00:33:09

We may not be able to answer  
all the questions in the time allotted.

00:00:33:19 - 00:00:36:23

However, we will will prepare responses

00:00:36:23 - 00:00:41:09

and we will post them  
under the section of our project site

00:00:41:16 - 00:00:46:12

located at [www](http://www).

dominionenergy.com

00:00:46:23 - 00:00:49:23

/loudounpws

00:00:50:16 - 00:00:52:18

For the next 20 to 25 minutes,

00:00:52:18 - 00:00:55:20

we're going to be sharing  
projects, specific information.

00:00:56:07 - 00:00:58:20

We will then take a quick break

00:00:58:20 - 00:01:02:02

during the break, we'll review  
the questions that you've submitted

00:01:02:02 - 00:01:05:02

through the Q&A process  
throughout the presentation

00:01:05:07 - 00:01:08:10

and we will categorize them  
so that we can address

00:01:08:10 - 00:01:11:10

as many questions  
as we can in the allotted time.

00:01:12:05 - 00:01:14:02

This meeting is being recorded

00:01:14:02 - 00:01:17:24

and will be posted on the  
website in the upcoming days.

00:01:19:22 - 00:01:20:22

Dominion is

00:01:20:22 - 00:01:23:22

applying for a commission permit  
with Loudoun County.

00:01:23:22 - 00:01:28:01

Anytime there is a public utility center,  
we are required to do so.

00:01:28:23 - 00:01:31:21

This is a voluntary  
public engagement session.

00:01:31:21 - 00:01:35:21

We wanted to give our neighbors the chance  
to ask questions about the project.

00:01:36:21 - 00:01:39:00

The Planning Commission will meet in May

00:01:39:00 - 00:01:42:10

or June of this year  
to discuss our application.

00:01:43:22 - 00:01:46:02

Let me at this time asked my colleagues

00:01:46:02 - 00:01:49:02

if you came to turn on your cameras.

00:02:07:16 - 00:02:08:10

Okay.

00:02:08:10 - 00:02:09:12

Thank you so much, guys.

00:02:09:12 - 00:02:12:16

Like I say, you can go all camera  
this time just for the sake of bandwidth

00:02:12:16 - 00:02:15:16

to make sure we communicate with the rest  
of the community on the call.

00:02:16:20 - 00:02:19:20

Our team is here today  
to answer your questions.

00:02:20:02 - 00:02:21:19

You saw some of them on camera.

00:02:21:19 - 00:02:25:23

The team here today  
include Shelly, Juneau,

00:02:26:07 - 00:02:32:01

Charles, Georgia,  
Rob Matt carefully insured

00:02:33:04 - 00:02:34:02

Dominion Energy.

00:02:34:02 - 00:02:37:02

We are committed to public engagement  
and outreach.

00:02:37:12 - 00:02:40:02

This is the team that will be here  
to answer your questions.

00:02:40:02 - 00:02:44:17

And with this group of project managers,  
engineers, routing specialists

00:02:44:17 - 00:02:48:11

and communication folks here,  
you'll be in good hands over the next hour

00:02:48:11 - 00:02:51:11

or so.

00:03:03:07 - 00:03:03:20

Okay.

00:03:03:20 - 00:03:05:22

So let me begin with the presentation.

00:03:05:22 - 00:03:09:21

Now, we'll talk a little bit  
about the panel wiring shop overview.

00:03:10:18 - 00:03:14:02

The purpose of building  
this new facility is vital to assisting

00:03:14:02 - 00:03:18:18  
with the increasing low growth demand  
in the Northern Virginia corridor.

00:03:19:06 - 00:03:22:15  
The panels are built in the facility  
and being stored before

00:03:22:15 - 00:03:25:00  
they are shipped to additional locations.

00:03:25:00 - 00:03:27:09  
They are on the Dominion grid.

00:03:27:09 - 00:03:31:09  
Dominion has additional wire facilities,  
but this will be the first

00:03:31:15 - 00:03:35:00  
that has integrated Dice Bay technology.

00:03:35:16 - 00:03:39:18  
This technology saves  
roughly four weeks in the overall process.

00:03:41:01 - 00:03:41:10  
To use

00:03:41:10 - 00:03:44:19  
a simple analogy,  
it is like constructing a modular home.

00:03:45:06 - 00:03:48:00  
The different parts,  
assuming the different panels,

00:03:48:00 - 00:03:51:00  
are assembled at a facility and stored.

00:03:51:03 - 00:03:54:06  
They shipped to a location

where the pieces are put together

00:03:54:06 - 00:03:57:06  
to make a finished product.

00:04:00:15 - 00:04:01:14  
Now we'll discuss

00:04:01:14 - 00:04:06:05  
some of the challenges, the needs,  
the need for expansion at this time.

00:04:06:06 - 00:04:09:15  
Right now,  
we only have one facility on the Dominion

00:04:09:15 - 00:04:12:15  
Grid, which is in Virginia.

00:04:12:18 - 00:04:16:06  
With that being said,  
we need to build this new facility

00:04:16:06 - 00:04:19:17  
to keep up with the demand  
that presents itself right now.

00:04:20:09 - 00:04:25:10  
Capital workload, the heavy workload  
supporting Virginia's Grid Transformation

00:04:25:10 - 00:04:28:11  
and Security Act,  
as well as the low growth

00:04:28:11 - 00:04:31:11  
in generating interconnections.

00:04:31:14 - 00:04:34:05  
From a demand perspective, powering homes

00:04:34:05 - 00:04:38:06  
and meeting the needs of businesses  
is vital for economic growth.

00:04:40:00 - 00:04:43:14

Now about vendor  
balance, securing more vendors, both

00:04:43:14 - 00:04:47:15

national and international,  
to assist with the increasing demand.

00:04:48:05 - 00:04:52:04

Increasing the creation of this facility  
will add more jobs,

00:04:52:04 - 00:04:56:01

which will include increase  
the amount of panels being built in-house.

00:04:56:13 - 00:04:59:13

To kind of, I guess, get back to that

00:04:59:16 - 00:05:02:12

balance that we need from the contractors

00:05:02:12 - 00:05:05:12

and the in-house panels  
that are assembled.

00:05:07:12 - 00:05:08:07

Geographic

00:05:08:07 - 00:05:11:22

needs a large portion  
of the increase in demand

00:05:11:22 - 00:05:15:16

for panels again  
exists in the Northern Virginia corridor.

00:05:16:12 - 00:05:20:04

Vendor  
You look as the Dominion uses contractors

00:05:20:16 - 00:05:24:21

that are both located national

and on an international perspective.

00:05:25:15 - 00:05:29:21

Operational security

A second facility provide security

00:05:29:21 - 00:05:33:11

in case of disasters

in existing facilities.

00:05:34:17 - 00:05:37:20

Keep in mind, this also highlights

one of our major goals

00:05:37:20 - 00:05:41:21

at the meeting

to create a safe and reliable network.

00:05:44:22 - 00:05:45:19

At this time,

00:05:45:19 - 00:05:50:04

I'm going to turn over the next portion

of the presentation to Shelley,

00:05:50:13 - 00:05:53:19

who will share her camera

so she can go through the next steps.

00:05:57:14 - 00:06:00:14

Thank you so much, Deon.

00:06:01:02 - 00:06:04:02

If you could just switch over

to the next slide also.

00:06:04:20 - 00:06:06:09

So my name is Shelley Percec.

00:06:06:09 - 00:06:08:02

Just want to reintroduce myself.

00:06:08:02 - 00:06:09:12

I'm with Kimberly Horne.

00:06:09:12 - 00:06:14:04

So we are the civil engineers and the permitting experts on the team here.

00:06:15:01 - 00:06:17:07

And I just kind of wanted to give an overview

00:06:17:07 - 00:06:20:24

of what is actually being constructed here as part of this site.

00:06:21:15 - 00:06:26:01

So overall, this site is located right off of Auburn Farm Road.

00:06:26:07 - 00:06:30:09

And you may have driven by the few substations that are already

00:06:30:09 - 00:06:33:09

existing north of our site, Castle.

00:06:34:07 - 00:06:39:08

But the actual building itself that we're proposing is about 72,000 square feet.

00:06:39:08 - 00:06:40:17

And total

00:06:41:16 - 00:06:42:22

gross floor area.

00:06:42:22 - 00:06:44:24

And it is all on one level.

00:06:44:24 - 00:06:48:20

So that equates to about 32 feet, about 32 feet in height.

00:06:49:08 - 00:06:53:14

This new building is being constructed on Dominion owned property,

00:06:53:14 - 00:06:57:15  
and Dominion's had this property  
for four multiple years. Now,

00:06:58:17 - 00:07:03:10  
other than the main facility itself,  
there will be a couple of accessory

00:07:03:10 - 00:07:06:24  
structures on the site that includes  
two new structures for storage.

00:07:07:08 - 00:07:10:16  
And so that everything is kind of kept  
out of line of sight there.

00:07:11:13 - 00:07:15:06  
There's also a aboveground  
fuel storage tank on the site

00:07:15:14 - 00:07:18:15  
that is only to be used by Dominion Energy

00:07:18:15 - 00:07:21:15  
employees and Dominion Energy Vehicles.

00:07:21:23 - 00:07:24:22  
And then other than that,  
there's a few backup systems

00:07:24:22 - 00:07:28:20  
for the site like generators,  
a diesel fire pump, a fire

00:07:28:20 - 00:07:32:05  
water tank and a compressed  
gas bottle storage.

00:07:32:20 - 00:07:35:20  
All of that will kind of be kept  
out of the view of the public

00:07:35:24 - 00:07:41:09

and the site will be heavily screened  
by a pretty thick landscape buffer area.

00:07:42:16 - 00:07:44:10

So it's a pretty self-contained site,

00:07:44:10 - 00:07:47:10

especially with those fire pumps  
and those water tanks.

00:07:51:08 - 00:07:53:00

So a few building components.

00:07:53:00 - 00:07:57:08

One is the 72,000 square feet  
actually consists of a small part of it

00:07:57:08 - 00:08:02:08

will go to office space training rooms,  
storage conference rooms and break rooms.

00:08:02:16 - 00:08:06:10

And primarily the larger areas  
will go to lab facilities.

00:08:06:10 - 00:08:10:01

And the assembly area  
that Deon had mentioned to assemble

00:08:10:01 - 00:08:13:04

those panels  
as well as those control enclosures.

00:08:13:22 - 00:08:18:06

And as always, Dominion is very committed  
to its environmental, sustainable.

00:08:18:15 - 00:08:22:14

So we will be pursuing  
a lead silver design for this project.

00:08:22:21 - 00:08:25:24

And a couple examples  
of how we're implementing that on site

00:08:26:08 - 00:08:29:08

are there's a site specific solar panels.

00:08:29:10 - 00:08:33:18

Those will be ground mounted  
and as well as electric vehicle

00:08:33:18 - 00:08:37:23

parking and charging spaces that are for  
Dominion's use of Dominion's employees.

00:08:41:23 - 00:08:43:12

So how does this impact you?

00:08:43:12 - 00:08:47:17

What does that mean for your day to day  
commute?

00:08:48:18 - 00:08:50:18

Hopefully, it impacts it positively.

00:08:50:18 - 00:08:54:09

We are looking to create more than 50  
job opportunities

00:08:54:09 - 00:08:58:09

all within the Northern Virginia area  
with this project.

00:08:58:19 - 00:09:02:06

And as far as traffic  
goes, we're only anticipating

00:09:02:06 - 00:09:07:02

about 1 to 2 deliveries per per week,  
a day of truck traffic.

00:09:07:12 - 00:09:11:12

And then nothing beyond the ordinary  
as far as your typical work hours.

00:09:12:21 - 00:09:17:07

The employees here would typically

be working about 7 to 4 p.m.

00:09:17:07 - 00:09:21:01

and not a lot of overnight or weekend work is expected.

00:09:25:11 - 00:09:28:03

And finally,  
to touch a little bit on Dominion's

00:09:28:03 - 00:09:31:22

commitment to the environment,  
we did several different things

00:09:31:22 - 00:09:36:10

as part of this project to make sure  
that we are doing to those commitments.

00:09:36:17 - 00:09:40:22

So the first was a number of bat surveys  
and eagle surveys,

00:09:41:04 - 00:09:45:11

and we have found that there was no bats  
equals or bat nests detected

00:09:45:17 - 00:09:48:23

and also that  
this is not a suitable habitat for bats.

00:09:49:05 - 00:09:52:20

And this was confirmed  
by national agencies like the U.S.

00:09:52:23 - 00:09:55:06

Fish and Wildlife Services.

00:09:55:06 - 00:09:59:03

We also did some wetlands studies  
on the entire parcel,

00:09:59:10 - 00:10:02:23

and there were a few small wetlands  
found on the site.

00:10:03:06 - 00:10:05:24

But for the majority of it,  
we are not really disturbing.

00:10:05:24 - 00:10:09:21

The wetlands and the minimal disturbance  
that we will have is all

00:10:09:21 - 00:10:11:03

permitted by the Corps.

00:10:12:21 - 00:10:17:05

We also did we also have landscaping that.

00:10:17:09 - 00:10:20:22

So there's an entire 25 foot wide  
buffer from Auburn

00:10:20:22 - 00:10:23:24

Farm Road  
about 50 feet off of Auburn Farm Road,

00:10:24:23 - 00:10:27:05

and that is going to include 170

00:10:27:05 - 00:10:30:09

new plantings, including 120 new trees.

00:10:30:17 - 00:10:35:11

So we're very much keeping in mind  
that you really will not be able to see

00:10:35:17 - 00:10:39:05

the site at all if you're driving along  
that main corridor there.

00:10:41:07 - 00:10:44:07

We did a sister at our sister  
site in Fishers ville.

00:10:44:07 - 00:10:47:07

We did do a sound level evaluation  
and found that

00:10:47:07 - 00:10:50:14

it does not produce any more noise  
than your typical lawn mower.

00:10:50:20 - 00:10:54:13

So no noise is really anticipated  
to get to any of the

00:10:54:13 - 00:10:57:13

neighboring properties  
or any of the neighboring neighborhoods.

00:10:59:15 - 00:11:01:06

There was also no historical

00:11:01:06 - 00:11:04:06

or cultural features on the existing site

00:11:04:19 - 00:11:07:21

that includes graves  
or historically important buildings.

00:11:08:22 - 00:11:12:06

And finally, we're really keeping our site  
lighting in mind.

00:11:12:06 - 00:11:15:06

And with that, we're focusing on

00:11:15:07 - 00:11:18:05

keeping it local to the buildings  
and to the parking areas

00:11:18:05 - 00:11:21:14

just to provide enough  
lighting for the safety of the employees.

00:11:21:24 - 00:11:25:14

And all lighting will be  
dark-sky compliant, which just means it's

00:11:25:14 - 00:11:29:01

fully cut off from anywhere above the site

00:11:29:01 - 00:11:32:01  
and will not cause any light pollution.

00:11:32:12 - 00:11:34:19  
At this point, I'll hand over the mic over

00:11:34:19 - 00:11:37:19  
to Diane for some closing remarks.

00:11:43:05 - 00:11:43:22  
Thank you

00:11:43:22 - 00:11:46:22  
so much for that invaluable information.

00:11:47:07 - 00:11:50:19  
So again, we're going to go on  
to the summary at this point,

00:11:51:09 - 00:11:52:19  
just some of the points up here.

00:11:52:19 - 00:11:57:07  
As the electric grid grows,  
so does the demand for control panels.

00:11:57:22 - 00:12:01:20  
The upgrade of electric facilities  
in Northern Virginia is crucial

00:12:01:20 - 00:12:05:09  
to meet their needs for a safe  
and reliable network.

00:12:05:23 - 00:12:09:14  
As stated on so many occasions  
this evening, the electric grid

00:12:09:17 - 00:12:11:10  
demands are increasing.

00:12:11:10 - 00:12:15:02  
Thus, the panels that are made to support

00:12:15:03 - 00:12:18:09

the trans  
need as we move forward to the future.

00:12:18:23 - 00:12:22:14

The picture display on the screen  
right here is a picture of the panels

00:12:22:14 - 00:12:25:22

at the real facility that are made there.

00:12:26:11 - 00:12:28:23

All the wiring takes place  
by a single person

00:12:28:23 - 00:12:31:23

and all of this takes place by hand.

00:12:32:00 - 00:12:33:22

Something to keep in mind. Guess what?

00:12:33:22 - 00:12:34:23

As the

00:12:35:22 - 00:12:36:09

I guess the

00:12:36:09 - 00:12:39:09

workforce development  
that we have going forward,

00:12:39:18 - 00:12:43:05

like you said by Shelly,  
we're going to have 50 plus new jobs

00:12:43:05 - 00:12:46:02

that are come about for this,  
because with this one panel

00:12:46:02 - 00:12:49:11

that you see on the screen,  
it could take this person up

00:12:49:11 - 00:12:52:20

to a full week, working an eight hour day  
to get through this.

00:12:54:03 - 00:12:58:11

So with that being said, again,  
thank you for your support and partnership

00:12:58:11 - 00:13:03:15

in enhancing the resilience and efficiency  
of our utility services

00:13:05:12 - 00:13:06:18

at this point.

00:13:06:18 - 00:13:09:22

We're going to open up for questions,  
feedback and collaboration

00:13:09:22 - 00:13:12:22

to ensure the success of this venture.

00:13:13:01 - 00:13:17:00

Make sure to continue  
to add your questions in the Q&A section.

00:13:17:14 - 00:13:17:23

All right.

00:13:17:23 - 00:13:22:02

What we're going to do at this time,  
we're going to take a slight pause.

00:13:22:05 - 00:13:25:03

You're going to hear silence right now

00:13:25:03 - 00:13:28:08

as far as the presentation,  
going to remove it from the screen.

00:13:28:19 - 00:13:32:11

You will not see anyone on the camera  
at all.

00:13:32:19 - 00:13:35:01

We're going to evaluate the questions we have.

00:13:35:01 - 00:13:39:00

Try to come up with the responses to make sure that we can give you back

00:13:39:00 - 00:13:40:09

the correct information.

00:13:40:09 - 00:13:40:23

So, again,

00:13:40:23 - 00:13:44:19

I appreciate your patience with this and we'll get back with you all shortly.

00:14:04:19 - 00:14:07:15

So, Dan,  
of course, our attendees are welcome

00:14:07:15 - 00:14:11:23

to continue  
submitting questions into the Q&A portion.

00:14:12:15 - 00:14:15:15

But I do have one question to start us off.

00:14:16:04 - 00:14:20:07

One of our attendees asked if this project is related at all

00:14:20:07 - 00:14:23:09

to the Auburn Farm Road expansion project.

00:14:30:01 - 00:14:33:01

I can help answer that.

00:14:34:04 - 00:14:35:15

Okay.

00:14:35:15 - 00:14:38:03

Is that the only thing we have  
at this point right now?

00:14:38:03 - 00:14:41:03  
Jana?

00:14:41:13 - 00:14:42:11  
That's correct.

00:14:42:11 - 00:14:44:17  
I'll keep monitoring additional questions.

00:14:44:17 - 00:14:46:18  
Come in.

00:14:46:18 - 00:14:48:15  
So I think we'll move on to do

00:14:48:15 - 00:14:51:24  
maybe the Shelly,  
you can have that cued up.

00:14:51:24 - 00:14:54:24  
Maybe we'll wait  
maybe three or four more minutes.

00:14:55:03 - 00:14:57:03  
We'll try to see if we get any more.

00:14:57:03 - 00:15:01:09  
And then I guess we can try to do it up  
all together.

00:15:02:19 - 00:15:05:19  
Gena, what's your opinion on these?

00:15:07:05 - 00:15:08:12  
I think we can move forward.

00:15:08:12 - 00:15:12:06  
Diane, as as folks  
have additional questions, continue

00:15:12:06 - 00:15:15:18

to submit those in the Q&A portion,  
and we'll make sure that we address

00:15:15:18 - 00:15:18:19

all of those  
before concluding tonight's meeting.

00:15:21:17 - 00:15:24:17

Okay.

00:15:28:22 - 00:15:29:13

So I guess at

00:15:29:13 - 00:15:32:13

this point then, Shelly,  
I guess you can come off of mute

00:15:32:15 - 00:15:37:19

or matter of fact,  
what I'm going to do is I'm going to hear

00:15:37:20 - 00:15:41:04

what the question is  
and make sure I have it right again.

00:15:41:04 - 00:15:44:11

Gena, can you explain it again  
or share it with me

00:15:44:11 - 00:15:47:11

again?

00:15:47:16 - 00:15:48:12

Absolutely.

00:15:48:12 - 00:15:51:12

So our questioner was asking

00:15:51:16 - 00:15:54:09

if this project is related to the Auburn

00:15:54:09 - 00:15:57:09

Farm Road Expansion project.

00:15:58:23 - 00:16:02:17

This project is not directly related  
to the Auburn Farm

00:16:02:17 - 00:16:06:08

Road expansion project  
that is in the county's purview.

00:16:07:14 - 00:16:10:17

But what we are doing to keep that future

00:16:10:17 - 00:16:13:17

development in mind is we are.

00:16:15:15 - 00:16:18:22

Our site is located  
far back enough from Auburn Farm Road

00:16:18:22 - 00:16:24:10

to accommodate the expansion, as well  
as our landscaping buffer that is all held

00:16:24:17 - 00:16:28:05

far enough back where that impact,  
where the expansion of the road

00:16:28:05 - 00:16:31:08

will only help us  
and not hurt the project or the road.

00:16:35:22 - 00:16:38:22

Thank you, Shelly.

00:16:38:22 - 00:16:40:22

Diane  
That's the only question that we have

00:16:40:22 - 00:16:43:22

for now.

00:16:46:23 - 00:16:47:23

Okay.

00:16:47:23 - 00:16:49:11

You know, thank you so much.

00:16:49:11 - 00:16:54:12

What I'm going to do at this point now,  
I'm going to go back to sharing my screen

00:16:54:12 - 00:16:58:04

just for the closing that I have  
for this evening.

00:17:14:03 - 00:17:14:14

Okay.

00:17:14:14 - 00:17:18:02

So again, now we have on this slide,  
this is our contact information.

00:17:18:13 - 00:17:19:17

This is the information

00:17:19:17 - 00:17:22:23

for the presenters that we have  
for this evening by information.

00:17:23:14 - 00:17:27:11

My job title,  
you can see my email address there, Don.

00:17:27:13 - 00:17:31:03

Got that right to me  
energy account dot com.

00:17:31:19 - 00:17:33:06

We have Shelly's information

00:17:33:06 - 00:17:36:14

below that there again  
the gambling on my project manager.

00:17:37:00 - 00:17:40:04

Her email address is listed there as well.

00:17:42:14 - 00:17:43:23

I would just pause right there.

00:17:43:23 - 00:17:46:14

Just a one second  
in case you're trying to write that down.

00:17:47:14 - 00:17:48:04

But again,

00:17:48:04 - 00:17:51:05

you can  
continue to put questions in the Q&A.

00:17:51:05 - 00:17:51:24

So if you're something

00:17:51:24 - 00:17:55:10

that I moved on to pass or you didn't  
get all the information you need

00:17:55:20 - 00:17:58:23

is fine, you can access it  
and we still can respond to that.

00:18:04:06 - 00:18:07:05

But lastly here, just talking about  
how to stay informed.

00:18:07:05 - 00:18:13:02

After tonight, you can email us  
at Powerline at Dominion Energy dot com.

00:18:13:17 - 00:18:21:02

You can call us at 8882910190.

00:18:21:20 - 00:18:25:19

As a reminder, we have information  
about this project online

00:18:25:19 - 00:18:29:19

a w w that the mean energy dot

00:18:29:19 - 00:18:32:21

com slash Loudon twc.

00:18:32:24 - 00:18:36:15

Or you can scan this QR code  
that's on the screen.

00:18:36:24 - 00:18:40:14

It will take you directly to the website  
for this project.

00:18:42:01 - 00:18:44:16

We will also be placing  
a recording of this

00:18:44:16 - 00:18:47:16

meeting online in the upcoming days.

00:18:48:08 - 00:18:50:00

Thank you for joining us today.

00:18:50:00 - 00:18:52:00

We appreciate your patience.

00:18:52:00 - 00:18:56:08

We hold these meetings for you  
and I hope that you find them valuable.

00:18:56:19 - 00:18:59:15

Thanks for joining  
us and have a great evening.
