What is Renewable Energy?
It's energy from sources that replenish themselves.
This saves the Earth's resources!

Where do we get Renewable Energy?
Sources include wind, solar, biomass, geothermal and hydroelectricity.

What's so great about Renewable Energy?
It's sustainable!
It helps address climate change.
It helps dramatically reduce carbon dioxide (CO_2) emissions.
It helps reduce your carbon footprint!

How do I know my purchase goes toward Renewable Energy?
The use of renewable energy is accounted for through Renewable Energy Certificates (RECs).
When you participate in one of our programs, RECs are purchased on your behalf to match your electricity usage. Watch "A Day in the Life of a REC" to learn more!

How can I support Renewable Energy?
Dominion offers a variety of affordable programs designed to align with your values.
Pay a little extra each month and the electricity you use will be matched with a mixture of renewable energy.
