

ANNUAL CCR FUGITIVE DUST CONTROL REPORT

Virginia Electric and Power Company
Bremo Power Station
1038 Bremo Bluff Road
Bremo Bluff, VA 23022

December 15, 2017

Purpose

The Annual Coal Combustion Residuals (CCR) Fugitive Dust Control Report is produced by Virginia Electric and Power Company d/b/a Dominion Energy Virginia to comply with 40 CFR 257.80(c). This report documents actions to control fugitive dust during the annual period from October 15, 2016 to October 14, 2017.

Description of Fugitive Dust Controls

The Bremono Power Station employs industry accepted practices for controlling CCR fugitive dust from its operations at the East Pond, North Pond, and West Pond including the following:

Fugitive Dust Control Practice	Description
Conditioning of CCR	CCR materials are conditioned with water prior to loading into trucks for transport.
Truck tarps	Loaded trucks are covered with tarps prior to transport.
Limited travel routes	Travel routes from the loading area to the landfill are limited to minimize migration of fugitive dusts.
Speed limits	Speed limits are strictly enforced to minimize dust generation from truck travel.
Water spray of roads	Roads are sprayed routinely to minimize dust from operations and weather.
Road sweeping/scraping	Spilled or tracked CCR is promptly swept or scraped to remove from road or operating area.
Limiting exposed areas	The size of the areas of exposed CCR will be limited to minimize fugitive dust potential.
Use of windbreaks	Windbreaks, temporary or permanent, will be utilized to limit wind exposure to active areas.
Inclement weather work limits	Work that may generate fugitive dust will be limited during inclement weather.

Citizen Complaints

One citizen complaint was received during the annual period covered by this report.

Date of Complaint	Complainant's Name	Complainant's Contacts	Description of Complaint
12/12/2016	Not Provided	Not Provided	Dust coming from soil on Bremono Road from construction truck traffic.

Corrective Actions

To address the above citizen complaint, the Station confirmed material was removed from the outside of the trucks, instructed truck drivers to slow vehicle speed, and to increase street sweepers to minimize road disturbance.
