Project No. 21451866

October 2021 Amendment

1.0 POST-CLOSURE CARE REQUIREMENT

The Bremo Power Station (Station) existing Coal Combustion Residuals (CCR) surface impoundment North Ash Pond (NAP) is being closed by removal of CCR pursuant to 40 CFR 257.102(c) and the Station's Closure Plan for this pond. Consistent with the requirements of 40 CFR §257.104(a)(2) for post-closure care of CCR surface impoundments, a Post-Closure Care Plan is not required for a surface impoundment closed through CCR removal under 40 CFR 257.102(c). Therefore, a Post-Closure Care Plan for the NAP has not been developed.
