RE: Bremono Power Station: Adjacent Landowner Notification

Dear Ms. Clarke:

In accordance with the U.S. EPA's Coal Combustion Residuals Rule, 40 CFR § 257.95(g)(2), and the Virginia Solid Waste Management Regulations, 9 VAC 20-81-260.C.1.b, Virginia Electric and Power Company d/b/a Dominion Energy Virginia ("Dominion Energy") is providing this notification to CSXT concerning results of a recent groundwater study for the Bremono Power Station's East Ash Pond in Bremono Bluff, VA. As further described in the recently completed Assessment of Corrective Measures Report and Nature and Extent Study ("Assessment"), which will be available by September 30 at <https://www.dominionenergy.com/projects-and-facilities/electric-projects/coal-ash/ccr-rule-compliance-data-and-information>, groundwater monitoring wells located at the edge of Dominion Energy's property adjacent to CSXT's property were sampled to help define the nature and extent of groundwater impacts associated with the East Ash Pond.

Results from this sampling indicated levels of certain metals constituents above established groundwater protection standards applicable to onsite ash ponds. The Assessment notes that while this impacted groundwater is expected to extend off-site, there is no human exposure risk to the groundwater on either Dominion Energy's or CSXT's property. Also, all ash has been removed from the East and West Ash Ponds, and ash from the North Ash Pond eventually will be removed as required by Virginia state law. Finally, surface water monitoring results along the James River have shown no detection of the metals constituents, thus showing no unacceptable risk to human health or the environment.

Should you have any questions, please contact me at (804) 337-4356.

Sincerely,

A handwritten signature in blue ink that reads "Lisa C. Messinger".
