

# Extension of Closure Timeframe for CCR Surface Impoundments

**Date:** March 5, 2024

**Station:** Bremono Power Station

**Unit:** North Ash Pond

Pursuant to 40 C.F.R. § 257.102(f)(2), Virginia Electric and Power Company d/b/a Dominion Energy Virginia (Dominion Energy) is providing this first demonstration to extend the time necessary to close the North Ash Pond (NAP) at the Bremono Power Station in Bremono Bluff, Virginia. In March 2019, Governor Northam signed legislation (SB 1355) into law requiring the closure by removal of the NAP and other coal combustion residual (CCR) surface impoundments at Bremono Power Station and three other Dominion Energy facilities. The law requires that the CCR be removed for disposal to a lined landfill or for beneficiation. The plan and schedule for closure by removal is addressed in an Amended Closure Plan for the NAP.

Dominion Energy is in the process of obtaining necessary permits from the Virginia Department of Environmental Quality (DEQ) and other agencies for the siting and construction of a new, lined landfill adjacent to the NAP that will receive CCR removed from the NAP, along with related permits for the closure of the NAP. Once permitting and construction of the new landfill is complete, removal of CCR from the NAP will commence. Therefore, this first demonstration documents the need to extend the timeframe for closure of the NAP for two years as allowed under Section 257.102(f)(2) of the CCR rule.

## Certification

*I certify under penalty of law that I have personally examined and am familiar with the information submitted in this demonstration and all attached documents, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.*

Owner/Operator Signature

A handwritten signature in black ink, appearing to read "Molly A. Parker".
