

Extension of Closure Timeframe for CCR Surface Impoundments

Date: April 30, 2024

Station: Chesterfield Power Station

Unit: Upper Ash Pond

Pursuant to 40 C.F.R. § 257.102(f)(2), Virginia Electric and Power Company d/b/a Dominion Energy Virginia (Dominion Energy) is providing this first demonstration to extend the time necessary to close the Upper Ash Pond (UAP) at the Chesterfield Power Station in Chesterfield, Virginia. In March 2019, Governor Northam signed legislation (SB 1355) into law requiring the closure by removal of the UAP and other coal combustion residual (CCR) surface impoundments at Chesterfield Power Station and three other Dominion Energy facilities. The law requires that the CCR be removed for disposal to a lined landfill or for beneficiation. The plan and schedule for closure by removal is addressed in an Amended Closure Plan for the UAP.

Dominion Energy is in the process of obtaining necessary permits from the Virginia Department of Environmental Quality (DEQ) and other agencies for the closure of the UAP. Once permitting is complete, agreed upon closure processes and end points can be implemented to assure proper closure of the UAP. Therefore, this demonstration documents the need to extend the timeframe for closure of the UAP for two years as allowed under Section 257.102(f)(2) of the CCR rule.

Certification

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this demonstration and all attached documents, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

Owner/Operator Signature

A handwritten signature in black ink, appearing to read "Molly A. Parker".
