## 1.0 INTRODUCTION

This document presents the *2018 Annual Groundwater Monitoring and Corrective Action* report for the Ash Pond at South Carolina Electric & Gas (SCE&G) Wateree Generating Station in Wateree, Richland County, South Carolina in accordance with 40 CFR Part 257.90 (e). The Ash Pond is a coal combustion residuals (CCR) handling facility as defined by the US Environmental Protection Agency (EPA) CCR Rule (40 CFR Part 257.93).

This report presents the following information as required under 40 CFR Part 257.90 (e):

1. A facility map (aerial image) showing the Class 3 landfill and all background (or upgradient) and downgradient monitoring wells, including the well identification numbers, that are part of the groundwater monitoring program for the landfill;
2. Identification of additional monitoring wells that were installed during 2018, along with a narrative description of why the wells were installed;
3. In addition to all the monitoring data obtained under §§ 257.90 through 257.98, a summary including the number of groundwater samples that were collected for analysis for each background and downgradient well, the dates the samples were collected, and whether the sample was required by the detection monitoring or assessment monitoring programs;
4. A narrative discussion of transitions between monitoring programs (e.g., the date and circumstances for transitioning from detection monitoring to assessment monitoring in addition to identifying the constituent(s) detected at a statistically significant increase over background levels); and
5. Other information required to be included in the annual report as specified in Parts 257.90 through 257.98 of the CCR Rule.

The following sections present the components of the annual report.

## 2.0 GROUNDWATER MONITORING WELL SYSTEM

Five Type II groundwater monitoring wells (designated MW-AP-01 through MW-AP-05) were installed and developed at Wateree Station Ash Pond in March 2016 to serve as EPA CCR Rule Compliance monitoring wells. Rising head permeability (slug) tests were conducted at the new monitoring wells, as well as at existing monitoring wells MW-AP-01A and MW-AP-08, in May 2016. A site location map is presented as **Figure 1** and a site map showing the locations and designations of the monitoring wells at Wateree Station is presented as **Figure 2**. A South Carolina licensed well driller with Terracon, Inc. of Columbia, South Carolina (SC License #2116) performed the drilling and monitoring well installations. A South Carolina registered surveyor from the GEL Group, Inc. of Charleston, South Carolina (ELS SC license #15513) surveyed the monitoring wells for horizontal position, ground surface elevation and top of PVC pipe elevation.

The five Type II groundwater monitoring wells were installed to monitor groundwater quality in the vicinity of the Ash Pond in compliance with the groundwater monitoring requirements of the US EPA CCR Rule (40 CFR Part 257.93). In addition, existing monitoring wells MW-AP-01A and MW-AP-08, which are also used for NPDES and South Carolina Department of Health and Environmental Control (SCDHEC) groundwater monitoring compliance for the Ash Pond, are included as part of the monitoring well network for groundwater monitoring, as is monitoring well MW-FGD-01, which is used for EPA CCR Rule compliance monitoring of groundwater quality for the facility FGD Pond. Monitoring wells MW-AP-01A and MW-FGD-01 serve as up-gradient wells to monitor the quality of background groundwater in the surficial aquifer entering the area of the Ash Pond. The remaining monitoring wells (MW-AP-01 through MW-AP-05, and MW-AP-08) serve as down gradient wells to monitor the quality of groundwater down gradient of the Ash Pond.

The results of the September 2017 Detection Monitoring event indicated statistically significant increases in the concentrations of multiple EPA CCR Rule Appendix III constituents relative to background concentrations in groundwater at all down gradient compliance monitoring wells. Consequently, in accordance with 40 CFR Part 257.95, SCE&G conducted Assessment Monitoring at all EPA CCR Rule monitoring wells associated with the Ash Pond in March, June and September 2018 and established groundwater protection standards (GPS) for all detected EPA CCR Rule Appendix IV constituents. A notification of exceedance of the GPS based on the Assessment

Monitoring event conducted in March 2018 was placed in the facility operating record on October 17, 2018, in which arsenic and lithium were identified as constituents exceeding the GPS.

In accordance with the requirements of 40 CFR Part 257.95 (g)(1), a characterization of the nature and extent of the release of arsenic and lithium to groundwater was initiated in November 2018 (Release Characterization). As part of the Release Characterization, seven additional groundwater monitoring wells were installed in the vicinity of the Ash Pond in November and December 2018 to monitor groundwater quality and delineate the nature, extent and magnitude of the release of arsenic and lithium to groundwater. The additional monitoring wells included four shallow Type II wells, designated MW-AP-09, MW-AP-10, MW-AP-11 and MW-AP-12, and three deep Type III wells, designated MW-AP-03D, MW-AP-09D and MW-AP-11D. The Type III wells were installed immediately adjacent to the Type II sharing the same well number (e.g., MW-AP-03 and MW-AP-03D). The locations and designations of the additional groundwater monitoring wells installed at the site in November and December 2018 are shown in **Figure 2**. A South Carolina licensed well driller with Red Dog Drilling, LLC of Midland, North Carolina (SC License #1230) performed the drilling and monitoring well installations for monitoring wells MW-AP-03S, MW-AP-09, MW-AP-09D, MW-AP-10, MW-AP-11, MW-AP-11D and MW-AP-12. A South Carolina registered surveyor from Cox and Dinkins, Inc. of Columbia, South Carolina (ELS SC license #294) surveyed the monitoring wells for horizontal position, ground surface elevation and top of PVC pipe elevation.

### **3.0 GROUNDWATER MONITORING**

#### **3.1 Groundwater Sampling**

In accordance with 40 CFR Part 257.95, the first round of Assessment Monitoring was conducted on March 5 and 6, 2018 and included groundwater sampling from monitoring wells MW-AP-01A, MW-FGD-01, MW-AP-01 through MW-AP-05, and MW-AP-08. One groundwater sample was collected from each of the monitoring wells during the Assessment Monitoring event. All groundwater samples collected from the monitoring wells for Assessment Monitoring in March 2018 were analyzed by South Carolina Certified laboratories (SCE&G Central Laboratory (Certification Number 32006) and GEL Laboratories, LLC (Certification Numbers 10120001 and 10120002) for the constituents listed in Appendix III and Appendix IV of the EPA CCR Rule (40 CFR Parts 257.50 through 257.107).

In accordance with 40CFR Part 257.95 (d)(1), a confirmatory round of Assessment Monitoring was conducted on June 4 and 5, 2018 and included groundwater sampling from monitoring wells MW-AP-01A, MW-FGD-01, MW-AP-01 through MW-AP-05, and MW-AP-08. One groundwater sample was collected from each of the monitoring wells during the Assessment Monitoring event. All groundwater samples collected from the monitoring wells for Assessment Monitoring in June 2018 were analyzed by South Carolina Certified laboratories (SCE&G Central Laboratory and GEL Laboratories, LLC) for the constituents listed in Appendix III and Appendix IV of the EPA CCR Rule (40 CFR Parts 257.50 through 257.107).

In accordance with 40 CFR Part 257.95, the second round of Assessment Monitoring was conducted on September 10, 2018 and included groundwater sampling from monitoring wells MW-AP-01A, MW-FGD-01, MW-AP-01 through MW-AP-05, and MW-AP-08. One groundwater sample was collected from each of the monitoring wells during the Assessment Monitoring event. All groundwater samples collected from the monitoring wells for Assessment Monitoring in September 2018 were analyzed by South Carolina Certified laboratories (SCE&G Central Laboratory and GEL Laboratories, LLC) for the constituents listed in Appendix III and Appendix IV of the EPA CCR Rule (40 CFR Parts 257.50 through 257.107).

#### **3.2 Results of Field and Laboratory Analyses of Groundwater Samples**

The results of the field and laboratory analyses of the groundwater samples collected from the monitoring wells during the Assessment Monitoring events conducted in March, June and September 2018, as well as the Release Characterization monitoring

conducted in December 2018, are presented **Appendix A**. Historical results of field and laboratory analyses of groundwater samples collected from the Ash Pond monitoring wells for EPA CCR Rule compliance monitoring, including the Assessment and Release Characterization groundwater quality monitoring conducted in 2018, are presented in **Table 1**. Groundwater Protection Standards (GPS) established for groundwater at the Ash Pond are indicated beneath the name of each CCR Rule Appendix IV constituent listed in **Table 1**. The results of statistical analyses of data from the Assessment Monitoring events conducted in 2018 are presented in **Appendix B**.

### 3.3 Release Characterization

In accordance with 40 CFR Part 257.95 (g)(1), an initial round of groundwater sampling was conducted as part of the Release Characterization (discussed in **Section 2.0**) on December 11 and 12, 2018 and included groundwater sampling from monitoring wells MW-AP-01A, MW-AP-01 through MW-AP-05, MW-AP-08 through MW-AP-12, MW-AP-03D, MW-AP-09D and MW-AP-11D. One groundwater sample was collected from each of the monitoring wells during the Release Characterization monitoring event.

Groundwater samples collected from monitoring wells MW-AP-01A, MW-AP-01 through MW-AP-05, and MW-AP-08 during the December 2018 Release Characterization monitoring event were analyzed by SCE&G Central Laboratory for the constituents listed in Appendix III of the EPA CCR Rule (40 CFR Parts 257.50 through 257.107), as well as total arsenic and total lithium. Groundwater samples collected from monitoring wells MW-AP-03D, MW-AP-09, MW-AP-09D, MW-AP-10, MW-AP-11, MW-AP-11D and MW-AP-12 during the December 2018 Release Characterization monitoring event were analyzed by SCE&G Central Laboratory for the constituents listed in Appendix III and Appendix IV of the EPA CCR Rule (40 CFR Parts 257.50 through 257.107), except Radium 226/228.

The results of the Release Characterization monitoring conducted in December 2018 indicate: 1) arsenic was detected at concentrations exceeding the GPS in groundwater of 10 µg/L at monitoring wells MW-AP-02, MW-AP-03, MW-AP-03D, MW-AP-04, MW-AP-09, MW-AP-09D, MW-AP-10, MW-AP-11, MW-AP-11D and MW-AP-12; 2) cobalt was detected at concentrations exceeding the GPS in groundwater of 6 µg/L at monitoring wells, MW-AP-09D and MW-AP-11D; and 3) lithium was detected at concentrations exceeding the GPS in groundwater of 40 µg/L at monitoring wells MW-AP-03 and MW-AP-10. No other CCR Rule Appendix IV constituents were detected in

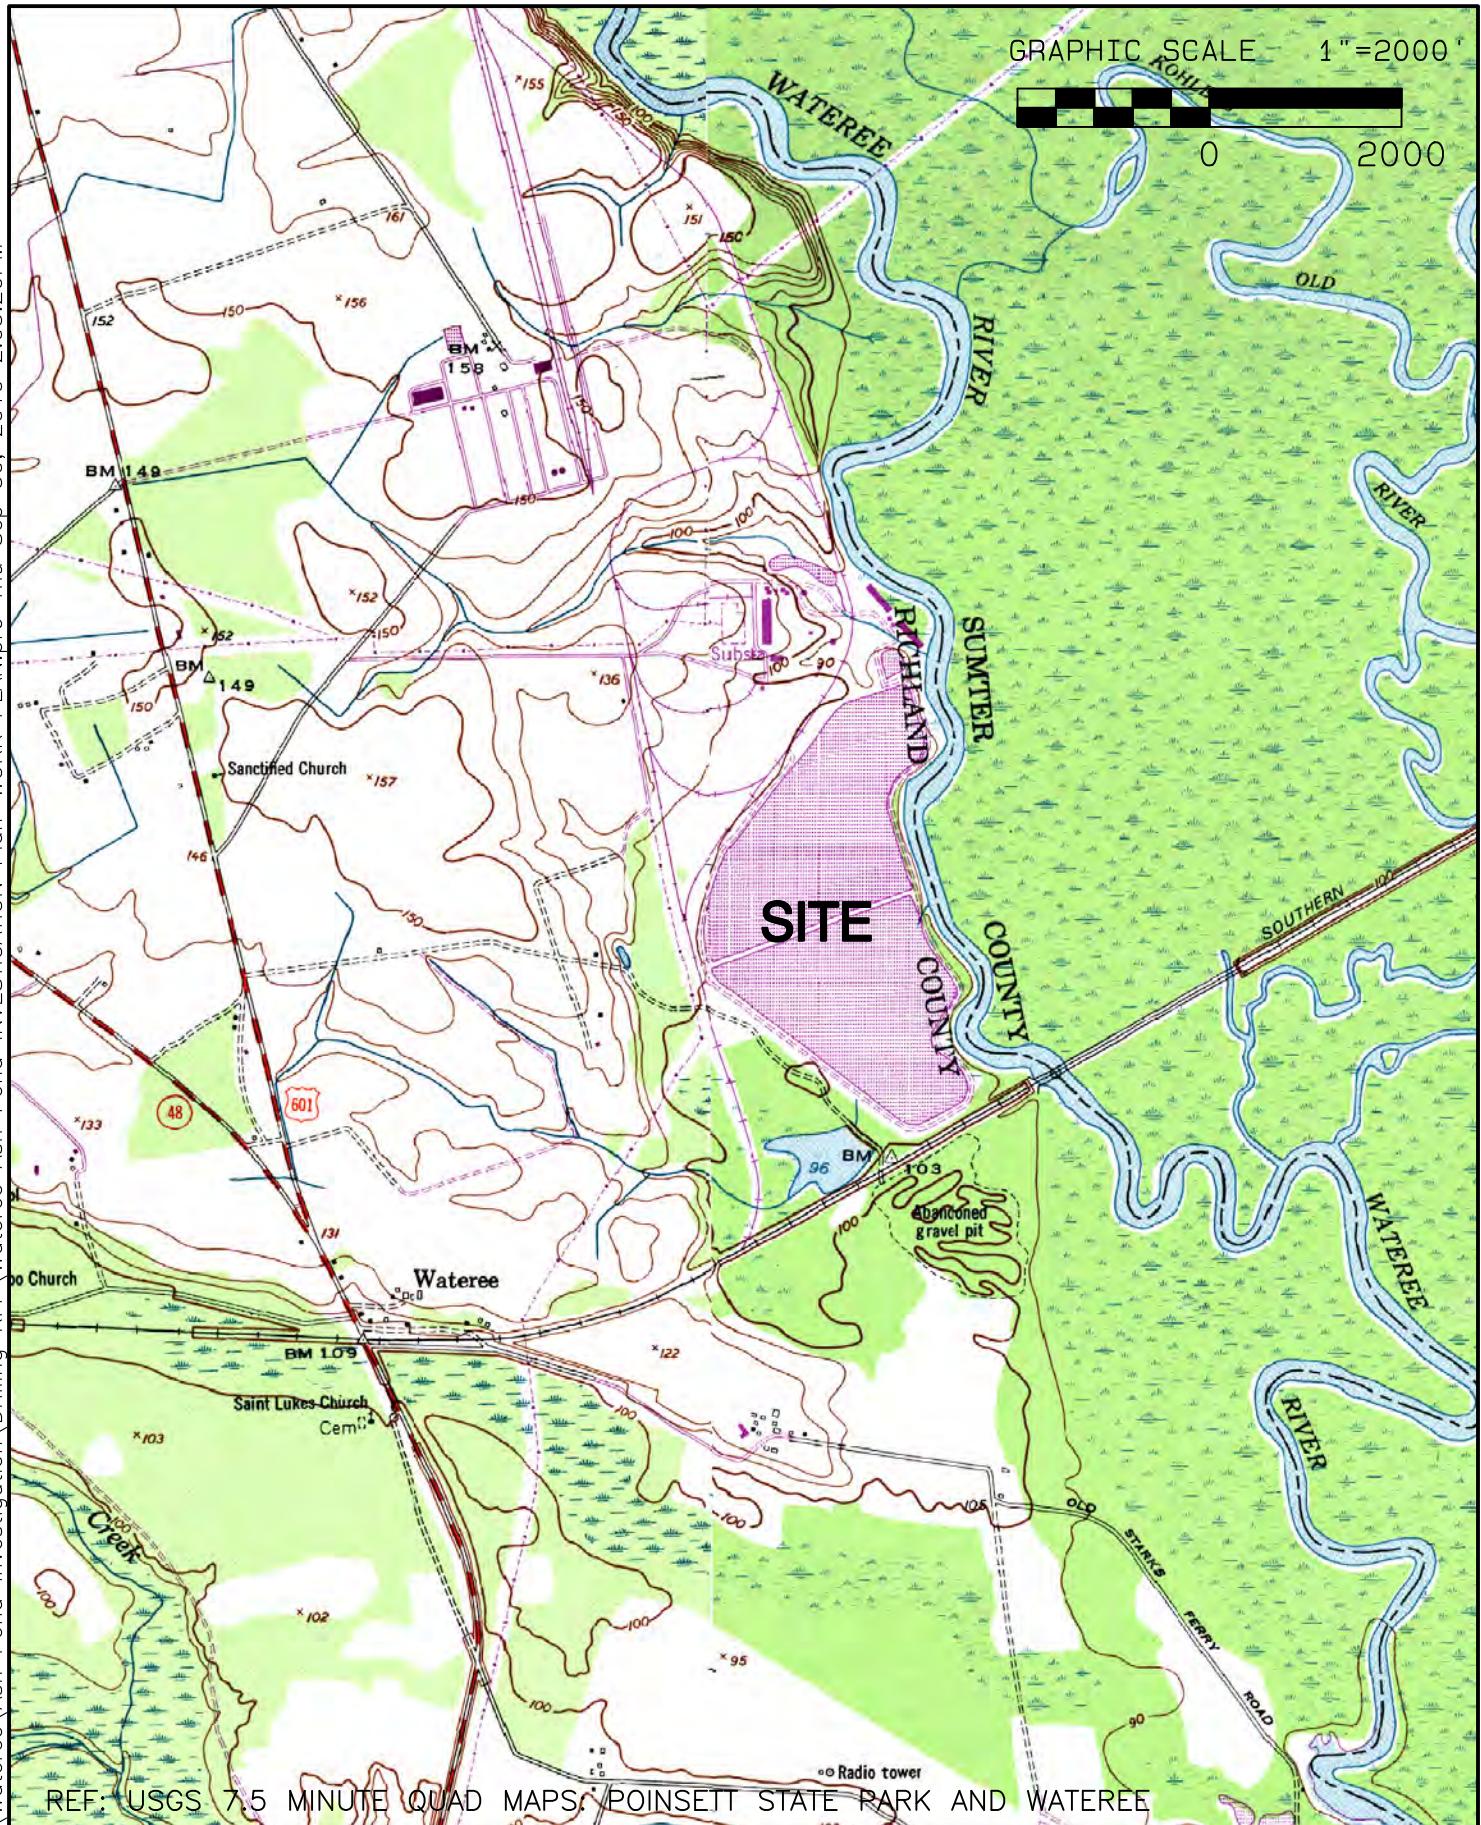

groundwater at concentrations in excess of the associated GPS during the December 2018 Release Characterization monitoring.

#### 4.0 KEY PROJECT ACTIVITIES FOR 2019

In 2019, the Release Characterization at the Ash Pond will be completed in accordance with 40 CFR Part 257.95 (g)(1). Based on the initial results of the Release Characterization groundwater quality monitoring completed in December 2018, it is anticipated that additional monitoring wells will need to be installed near the Ash Pond to complete delineation of the extent of arsenic in groundwater. It is further anticipated that the concentrations of arsenic, lithium, and possibly cobalt, detected in groundwater at certain monitoring wells during the December 2018 Release Characterization monitoring (and subsequent groundwater quality monitoring to be conducted in 2019) will be determined to be at statistically significant levels exceeding the corresponding GPS. Consequently, an Assessment of Corrective Measures (ACM) will be initiated and completed in 2019 in accordance with 40 CFR Part 257.96. Moreover, a public meeting will be held subsequent to placing the ACM report in the facility operating record to discuss the results of the ACM with interested and affected parties. Following the public meeting, a remedy will be selected for addressing groundwater contamination at the Ash Pond, and a final report will be prepared describing the selected remedy and how it meets the standards set forth in 40 CFR Part 257.97 (b). Implementation of the corrective action program may be initiated in 2019 depending on the length of time required to complete the preceding steps in the process leading to corrective action implementation.

Assessment Monitoring will continue in 2019. Two rounds of Assessment Monitoring will be completed during March and September 2019 with groundwater samples being collected from monitoring wells MW-AP-01A, MW-FGD-01, MW-AP-01 through MW-AP-05, MW-AP-08 through MW-AP-12, MW-AP-03D, MW-AP-09D and MW-AP-11D.

Notes: Monitoring well locations highlighted in green are background monitoring locations.

Monitoring well locations highlighted in orange are down gradient compliance monitoring locations.

BG = Background; For those constituents for which a Maximum Contaminant Level (MCL) has not been established by the US EPA, detected concentrations in groundwater at compliance monitoring well locations are compared to concentrations detected

**Certificate of Analysis Report  
for**  
**GEEL003 GEL Engineering, LLC**  
**Client SDG: 445507 GEL Work Order: 445507**

**The Qualifiers in this report are defined as follows:**

- \* A quality control analyte recovery is outside of specified acceptance criteria
- \*\* Analyte is a Tracer compound
- \*\* Analyte is a surrogate compound
- U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the Certificate of Analysis.

The designation ND, if present, appears in the result column when the analyte concentration is not detected above the limit as defined in the 'U' qualifier above.

This data report has been prepared and reviewed in accordance with GEL Laboratories LLC standard operating procedures. Please direct any questions to your Project Manager, Jake Crook.

**Notes:**

The Qualifiers in this report are defined as follows:

\*\* Analyte is a Tracer compound

< Result is less than value reported

> Result is greater than value reported

## QC Summary

Workorder: 445507

Page 2 of 2

Parmname	NOM	Sample	Qual	QC	Units	RPD%	REC%	Range	Anlst	Date	Time
BD	Results are either below the MDC or tracer recovery is low										
FA	Failed analysis.										
H	Analytical holding time was exceeded										
J	Value is estimated										
K	Analyte present. Reported value may be biased high. Actual value is expected to be lower.										
L	Analyte present. Reported value may be biased low. Actual value is expected to be higher.										
M	M if above MDC and less than LLD										
M	REMP Result > MDC/CL and < RDL										
N/A	RPD or %Recovery limits do not apply.										
N1	See case narrative										
ND	Analyte concentration is not detected above the detection limit										
NJ	Consult Case Narrative, Data Summary package, or Project Manager concerning this qualifier										
Q	One or more quality control criteria have not been met. Refer to the applicable narrative or DER.										
R	Sample results are rejected										
U	Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.										
UI	Gamma Spectroscopy--Uncertain identification										
UJ	Gamma Spectroscopy--Uncertain identification										
UL	Not considered detected. The associated number is the reported concentration, which may be inaccurate due to a low bias.										
X	Consult Case Narrative, Data Summary package, or Project Manager concerning this qualifier										
Y	Other specific qualifiers were required to properly define the results. Consult case narrative.										
^	RPD of sample and duplicate evaluated using +/-RL. Concentrations are <5X the RL. Qualifier Not Applicable for Radiochemistry.										
h	Preparation or preservation holding time was exceeded										

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more or %RPD not applicable.

<sup>^</sup>The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptance criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.

\* Indicates that a Quality Control parameter was not within specifications.

For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

GL-CHL-SR-001 Rev 5

**Radiochemistry**  
**Technical Case Narrative**  
**GEL Engineering, LLC (GEEL)**  
**SDG #: 445507**

**Product:** GFPC, Ra228, Liquid

**Analytical Method:** EPA 904.0/SW846 9320 Modified

**Analytical Procedure:** GL-RAD-A-063 REV# 1

**Analytical Batch:** 1745881

The following samples were analyzed using the above methods and analytical procedure(s).

<b><u>GEL Sample ID#</u></b>	<b><u>Client Sample Identification</u></b>
445507001	MW-FGD-01
445507002	DUP-01
445507003	MW-AP-01A
445507004	MW-AP-01
445507005	MW-AP-02
445507006	MW-AP-03
445507007	MW-AP-04
445507008	MW-AP-05
1203986955	Method Blank (MB)
1203986956	445507008(MW-AP-05) Sample Duplicate (DUP)
1203986957	Laboratory Control Sample (LCS)

The samples in this SDG were analyzed on an "as received" basis.

**Data Summary:**

There are no exceptions, anomalies or deviations from the specified methods. All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable.

**Product:** Lucas Cell, Ra226, liquid

**Analytical Method:** EPA 903.1 Modified

**Analytical Procedure:** GL-RAD-A-008 REV# 15

**Analytical Batch:** 1745745

The following samples were analyzed using the above methods and analytical procedure(s).

<b><u>GEL Sample ID#</u></b>	<b><u>Client Sample Identification</u></b>
445507001	MW-FGD-01
445507002	DUP-01
445507003	MW-AP-01A
445507004	MW-AP-01

445507006	MW-AP-03
445507007	MW-AP-04
445507008	MW-AP-05

1203986698	Method Blank (MB)
1203986699	445471001(NonSDG) Sample Duplicate (DUP)
1203986700	445471001(NonSDG) Matrix Spike (MS)
1203986701	445471001(NonSDG) Matrix Spike Duplicate (MSD)
1203986702	Laboratory Control Sample (LCS)

The samples in this SDG were analyzed on an "as received" basis.

#### **Data Summary:**

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

#### **Quality Control (QC) Information**

##### **Duplication Criteria between MS and MSD**

The Matrix Spike and Matrix Spike Duplicate (See Below) do not meet the duplication requirement; however, they both meet the spiked recovery requirement.

Sample	Analyte	Value
1203986700MS and 1203986701MSD (Non SDG 445471001)	Radium-226	RPD 32.8* (0%-20%)

#### **Miscellaneous Information**

##### **Additional Comments**

The matrix spike and matrix spike duplicate, 1203986700 (Non SDG 445471001MS) and 1203986701 (Non SDG 445471001MSD), aliquots were reduced to conserve sample volume.

#### **Certification Statement**

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

**GEL LABORATORIES LLC**  
2040 Savage Road Charleston SC 29407 – (843) 556-8171 – [www.gel.com](http://www.gel.com)

**Certificate of Analysis Report  
for**  
**GEEL003 GEL Engineering, LLC**  
**Client SDG: 445508 GEL Work Order: 445508**

**The Qualifiers in this report are defined as follows:**

- \* A quality control analyte recovery is outside of specified acceptance criteria
- \*\* Analyte is a Tracer compound
- \*\* Analyte is a surrogate compound
- U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the Certificate of Analysis.

The designation ND, if present, appears in the result column when the analyte concentration is not detected above the limit as defined in the 'U' qualifier above.

This data report has been prepared and reviewed in accordance with GEL Laboratories LLC standard operating procedures. Please direct any questions to your Project Manager, Jake Crook.

< Result is less than value reported

> Result is greater than value reported

## QC Summary

Workorder: 445508

Page 2 of 2

Parmname	NOM	Sample	Qual	QC	Units	RPD%	REC%	Range	Anlst	Date	Time
BD	Results are either below the MDC or tracer recovery is low										
FA	Failed analysis.										
H	Analytical holding time was exceeded										
J	Value is estimated										
K	Analyte present. Reported value may be biased high. Actual value is expected to be lower.										
L	Analyte present. Reported value may be biased low. Actual value is expected to be higher.										
M	M if above MDC and less than LLD										
M	REMP Result > MDC/CL and < RDL										
N/A	RPD or %Recovery limits do not apply.										
N1	See case narrative										
ND	Analyte concentration is not detected above the detection limit										
NJ	Consult Case Narrative, Data Summary package, or Project Manager concerning this qualifier										
Q	One or more quality control criteria have not been met. Refer to the applicable narrative or DER.										
R	Sample results are rejected										
U	Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.										
UI	Gamma Spectroscopy--Uncertain identification										
UJ	Gamma Spectroscopy--Uncertain identification										
UL	Not considered detected. The associated number is the reported concentration, which may be inaccurate due to a low bias.										
X	Consult Case Narrative, Data Summary package, or Project Manager concerning this qualifier										
Y	Other specific qualifiers were required to properly define the results. Consult case narrative.										
^	RPD of sample and duplicate evaluated using +/-RL. Concentrations are <5X the RL. Qualifier Not Applicable for Radiochemistry.										
h	Preparation or preservation holding time was exceeded										

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more or %RPD not applicable.

<sup>^</sup>The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptance criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.

\* Indicates that a Quality Control parameter was not within specifications.

For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

## Wateree Station

### Assessment Monitoring Summary

**Location Id:** MW-AP-08

Background Data Information					Compliance Data Information											
Start	End	Count	Percent	Normal/ ND	Start	End	Count	Percent	Trend	Normal/ Lognormal	GWPS	Comparison	Compare	Comparison	GWPS	SSL

UCL - Upper Confidence Level Value

UCB - Upper Confidence Band Value at Last Sample Date

LCL - Lower Confidence Level Value

LCB - Lower Confidence Band Value at Last Sample Date

Mean - Compliance Data Mean

Median - Compliance Data Median

Each - When background is based on Last, Median, Minimum Detection Limit

PARA TI - Parametric Tolerance Interval

NPARA TI - Non Parametric Tolerance Interval

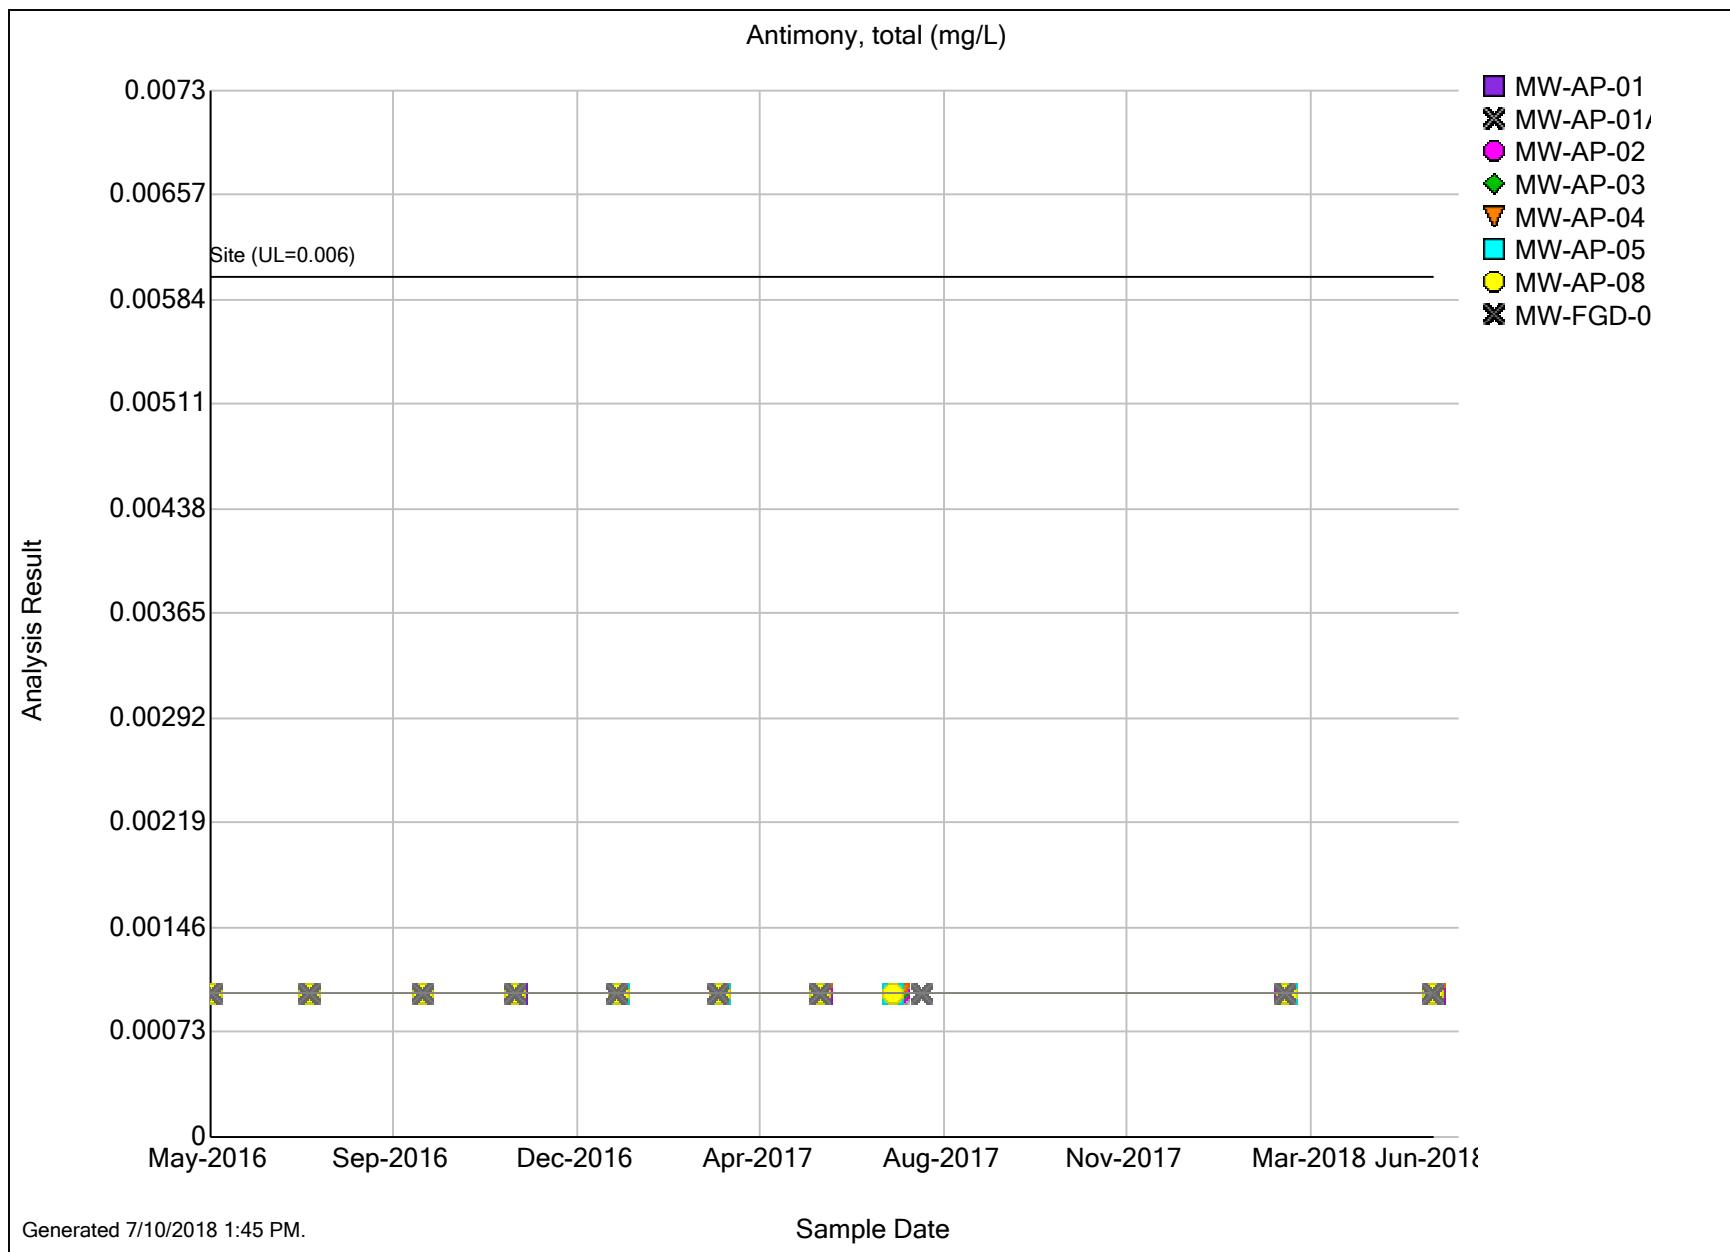

CI-Nrml - Confidence Interval around Normal Mean

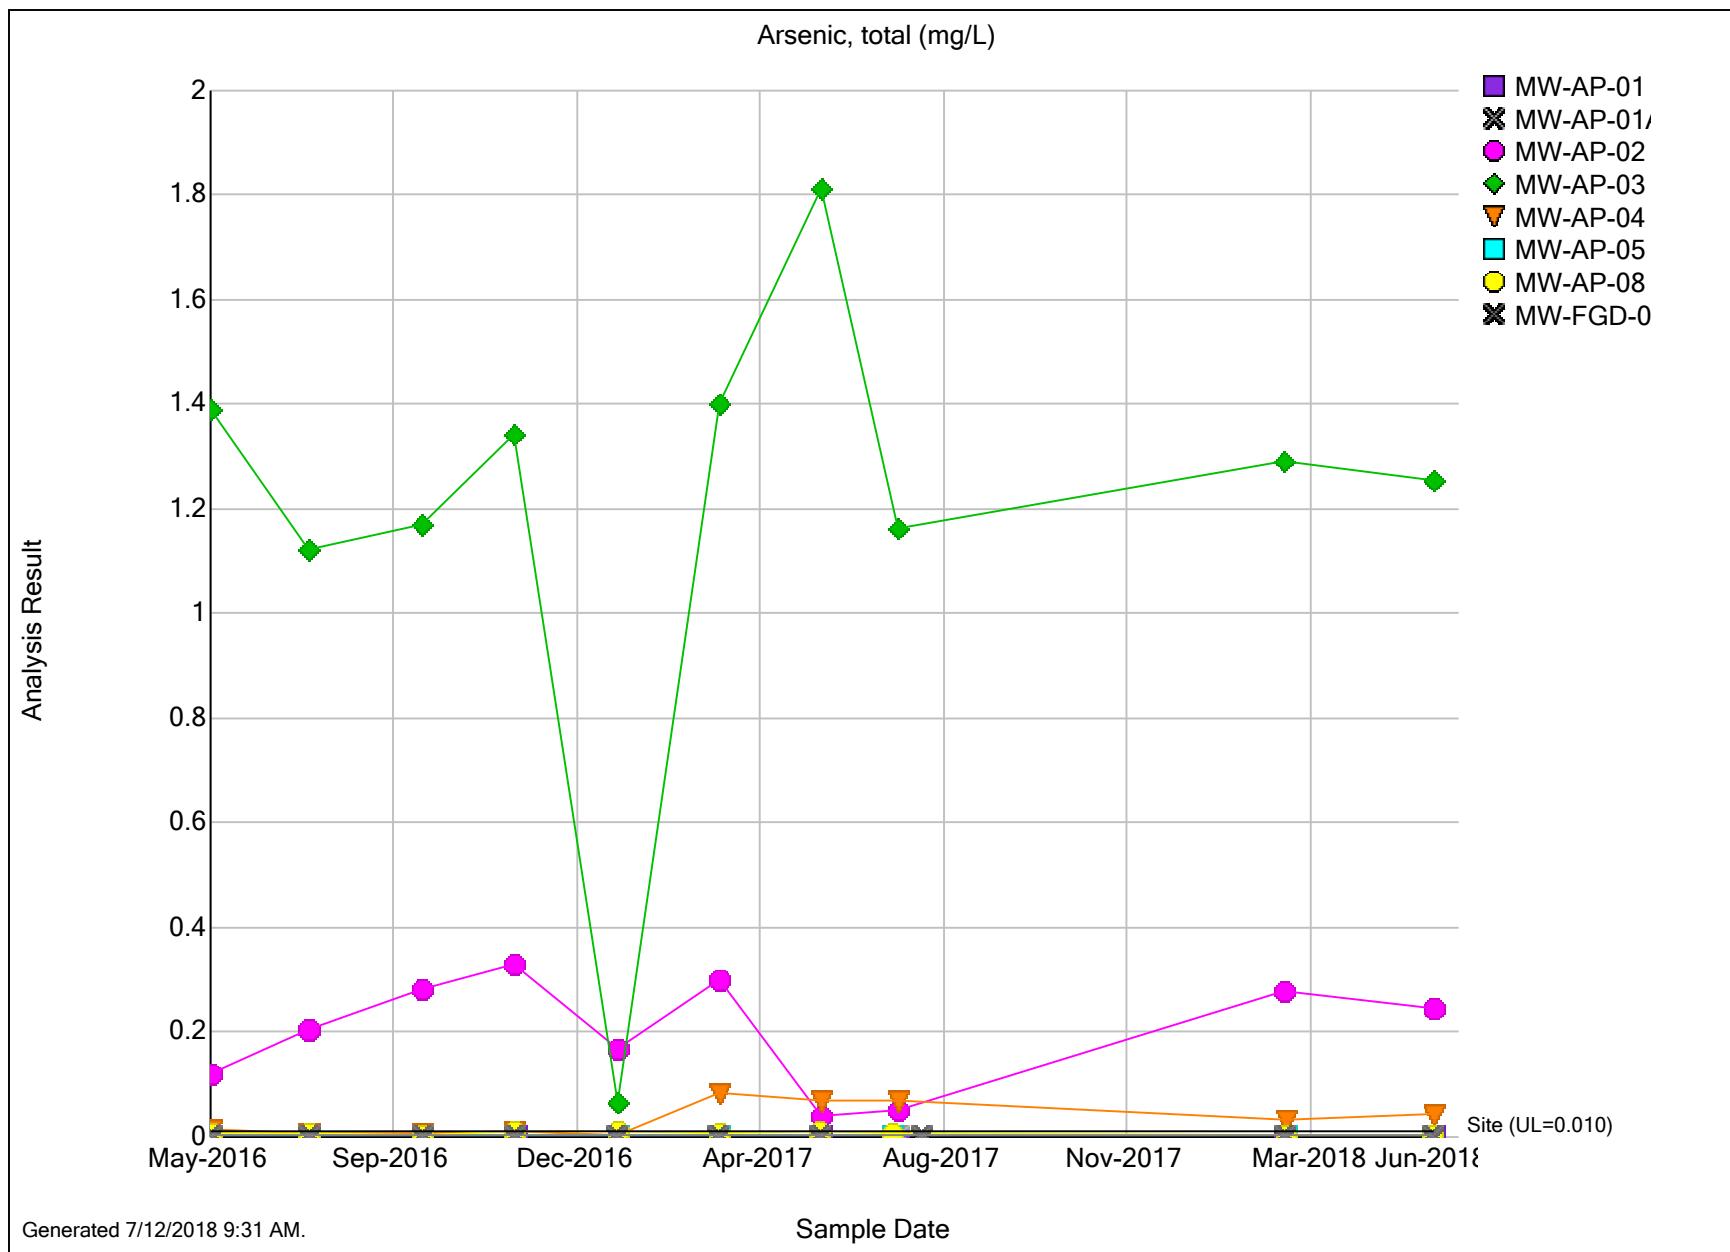

CI-Log - Confidence Interval around Log Normal Mean

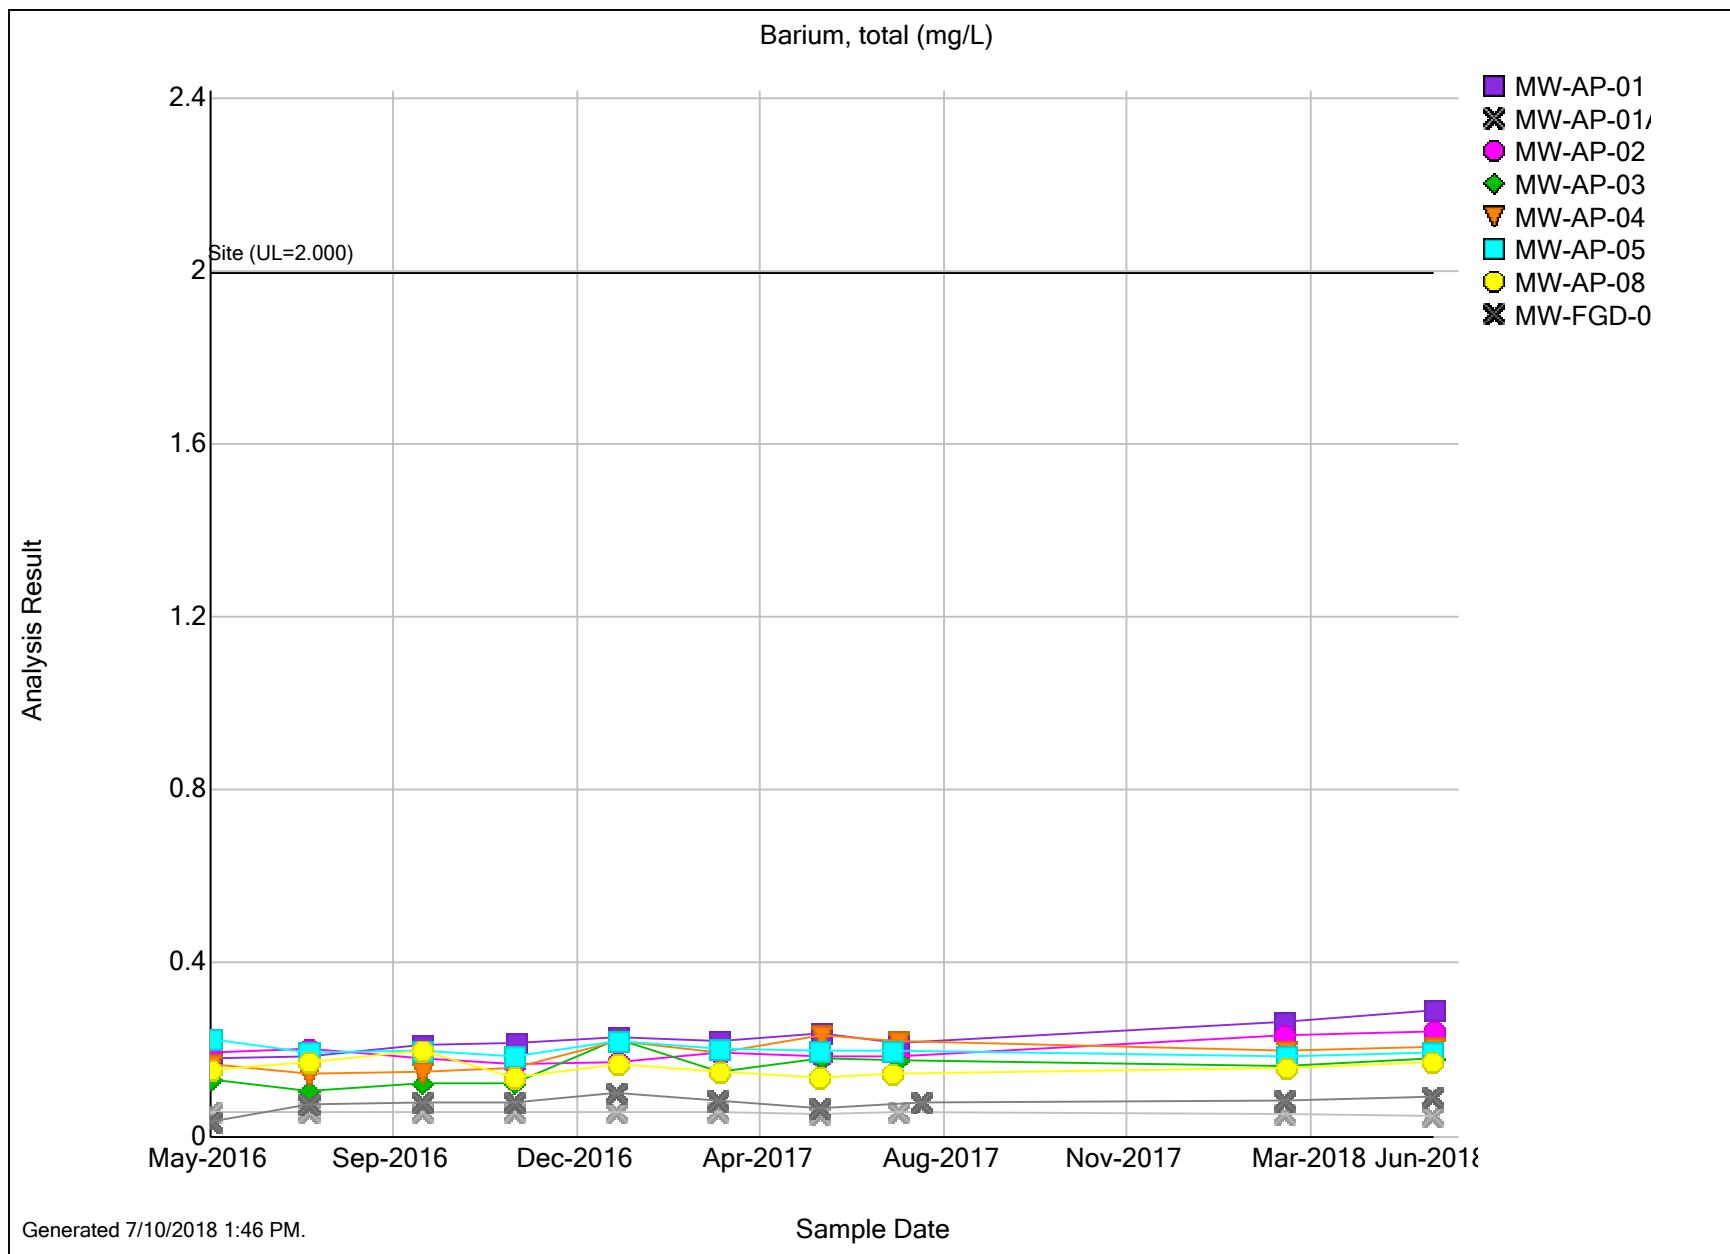

CI-NPARA - Non Parametric Confidence Interval around Median

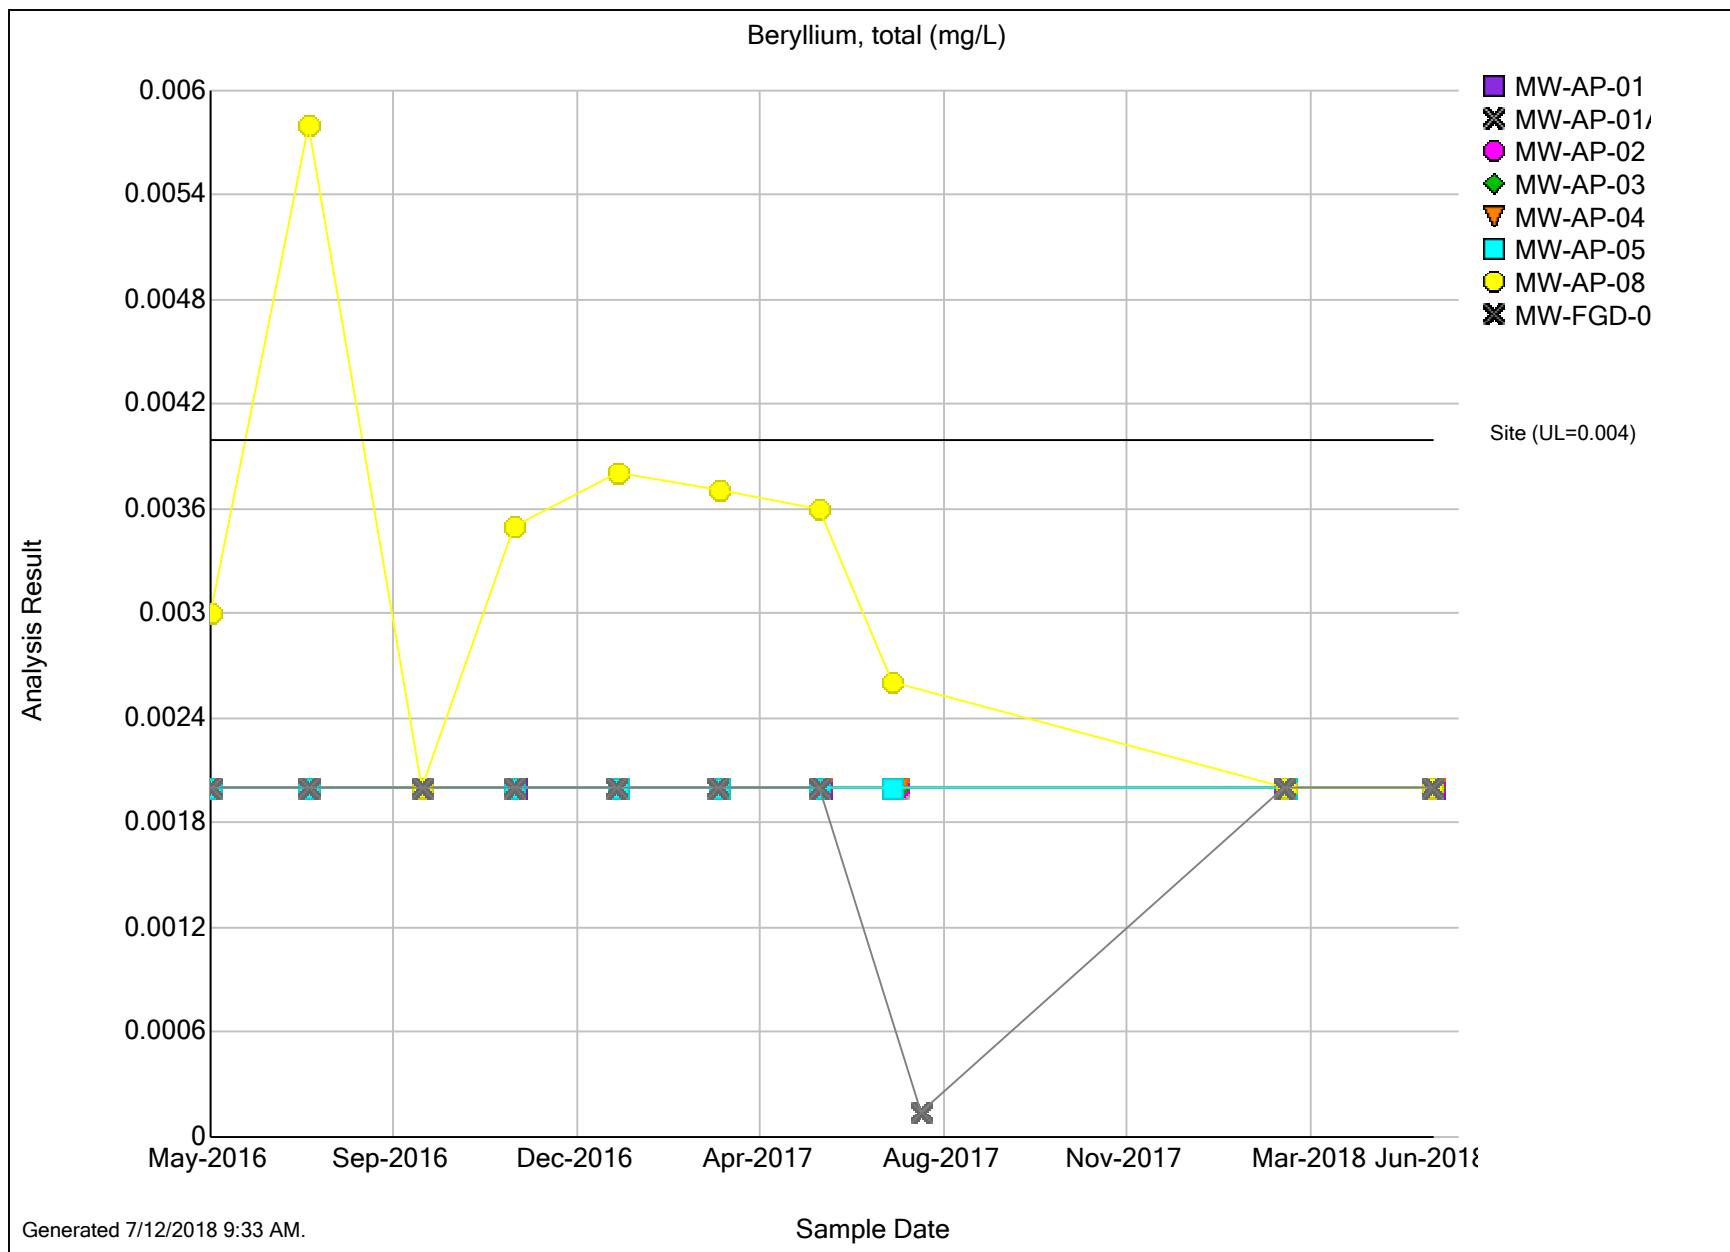

CB-LinReg - Confidence Band around Linear Regression

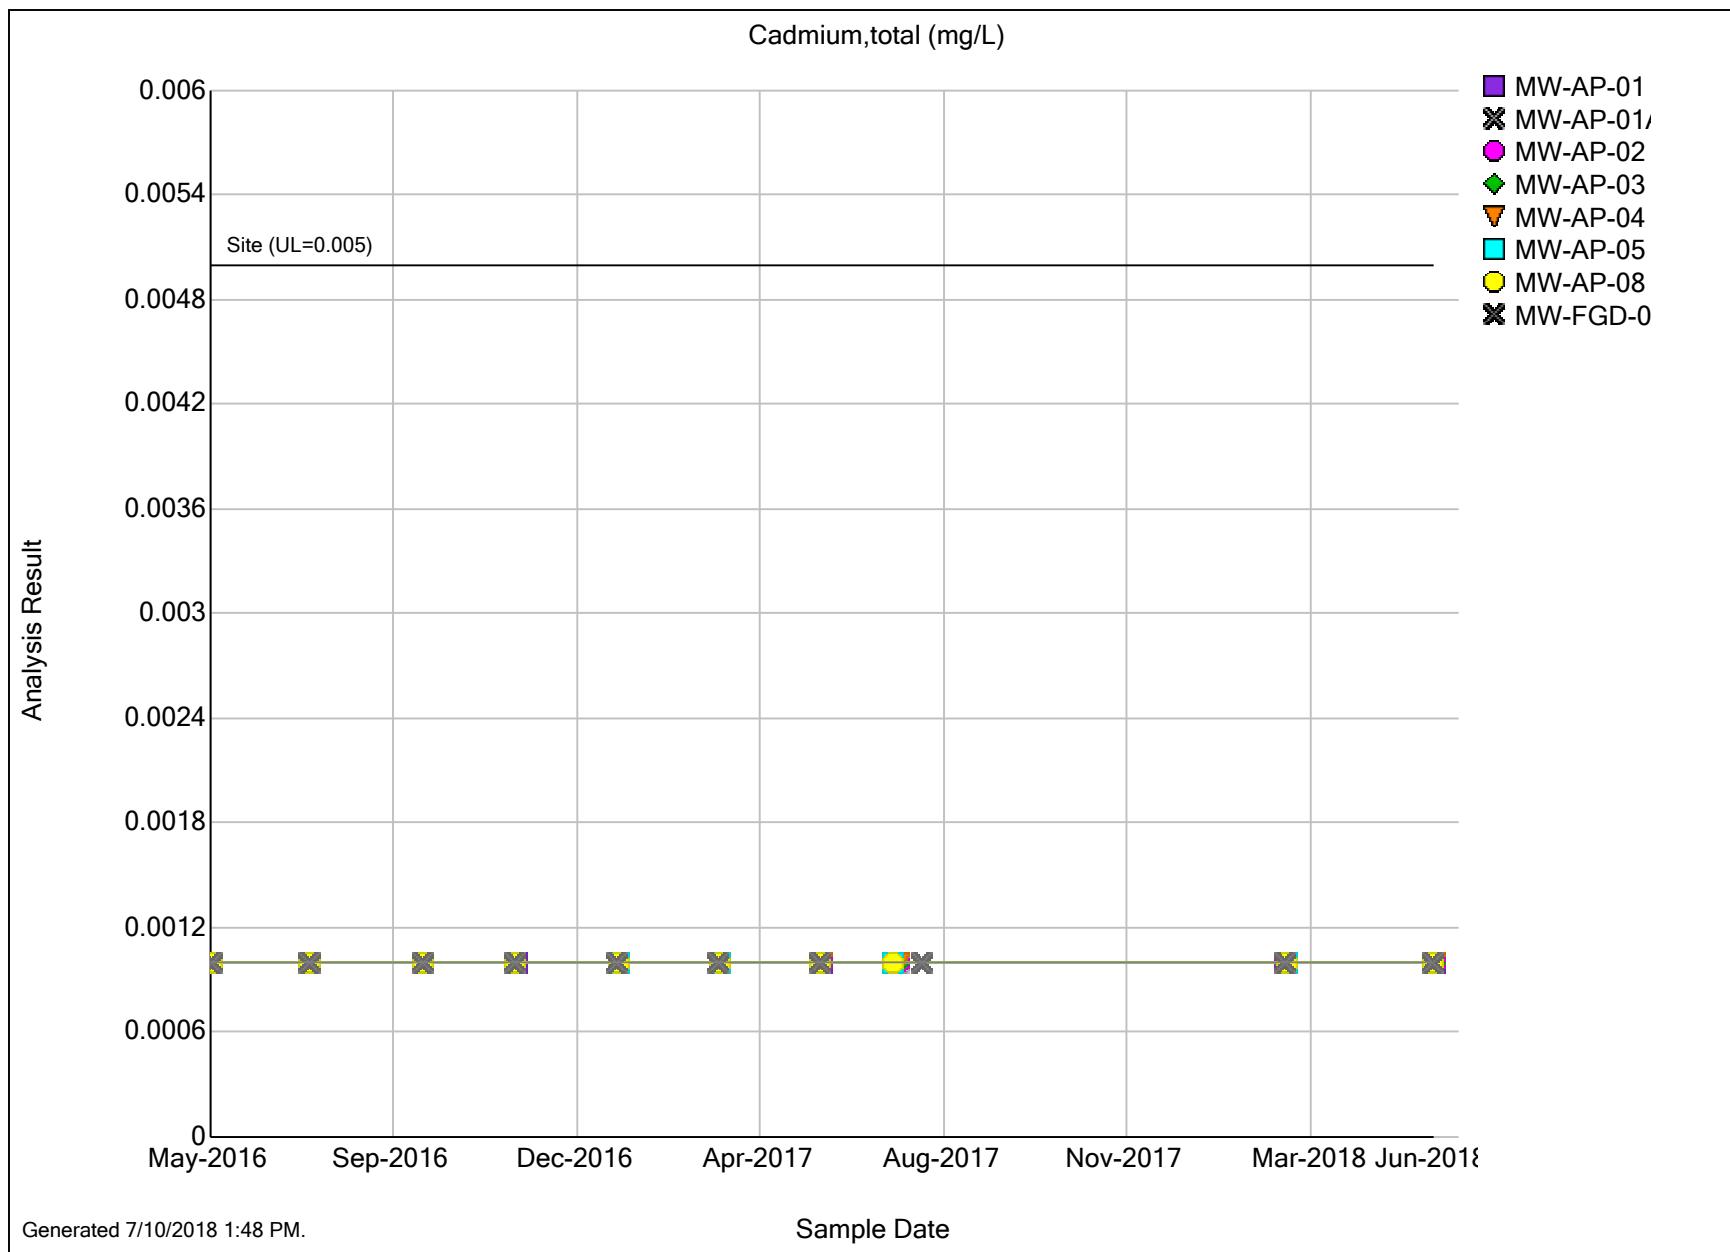

CB-TheilSen - Confidence Band around Theil-Sen line
