## **DOMINION ENERGY SOUTH CAROLINA WILLIAMS STATION FGD POND ANNUAL PROGRESS REPORT – ALTERNATIVE CLOSURE**

The Annual Progress Report for the Dominion Energy South Carolina Williams Station FGD Pond is prepared pursuant to *40 CFR §257.103 Alternative closure requirements* which states the following:

The owner or operator of a CCR landfill, CCR surface impoundment, or any lateral expansion of a CCR unit that is subject to closure pursuant to § 257.101(a), (b)(1), or (d) may continue to receive CCR in the unit provided the owner or operator meets the requirements of either paragraph (a) or (b) of this section.

(a)(1) No alternative CCR disposal capacity. Notwithstanding the provisions of § 257.101(a), (b)(1), or (d), a CCR unit may continue to receive CCR if the owner or operator of the CCR unit certifies that the CCR must continue to be managed in that CCR unit due to the absence of alternative disposal capacity both on-site and off-site of the facility. To qualify under this paragraph (a)(1), the owner or operator of the CCR unit must document that all of the following conditions have been met:

- (i) No alternative disposal capacity is available on-site or off-site. An increase in costs or the inconvenience of existing capacity is not sufficient to support qualification under this section;
- (ii) The owner or operator has made, and continues to make, efforts to obtain additional capacity. Qualification under this subsection lasts only as long as no alternative capacity is available. Once alternative capacity is identified, the owner or operator must arrange to use such capacity as soon as feasible;
- (iii) The owner or operator must remain in compliance with all other requirements of this subpart, including the requirement to conduct any necessary corrective action; and
- (iv) The owner or operator must prepare an annual progress report documenting the continued lack of alternative capacity and the progress towards the development of alternative CCR disposal capacity.

The Williams Station FGD Pond continues to undergo Alternative Closure in accordance with Section 257.103. Furthermore, the FGD Pond remains in operation due to continued lack of alternative CCR disposal capacity. Williams Station continues to make progress towards the development of alternative CCR disposal capacity. Further updates will be provide in the 2021 Annual Progress Report.
