Cottage Park Substation Grid Transformation Plan Project

Use your iPhone camera or the QR reader app on other smartphones to visit the project page on our website.

AT DOMINION ENERGY, we are committed to continually reviewing and analyzing our energy infrastructure to provide safe, reliable and affordable electricity to the communities we serve. You are receiving this postcard because we are preparing to upgrade equipment at our Cottage Park Substation located in the City of Norfolk. These important improvements are in accordance with the Grid

Dominion Energy image. Not project specific.

Transformation Plan and will enable advanced electric grid technology, as well as improve power quality monitoring. The substation's existing footprint will expand slightly to the east on Dominion Energy-owned property to accommodate new equipment, including a 12 feet by 30 feet control enclosure building. All improvements will be on the existing substation property located on the west side of Grove Avenue.

We are scheduled to begin engineering surveys on the substation property in the next few weeks. As part of this work, you may see our crews or contractors in and around the substation property on Grove Avenue between Grove Court and Edgewood Avenue. Our field access may include soil boring activities and

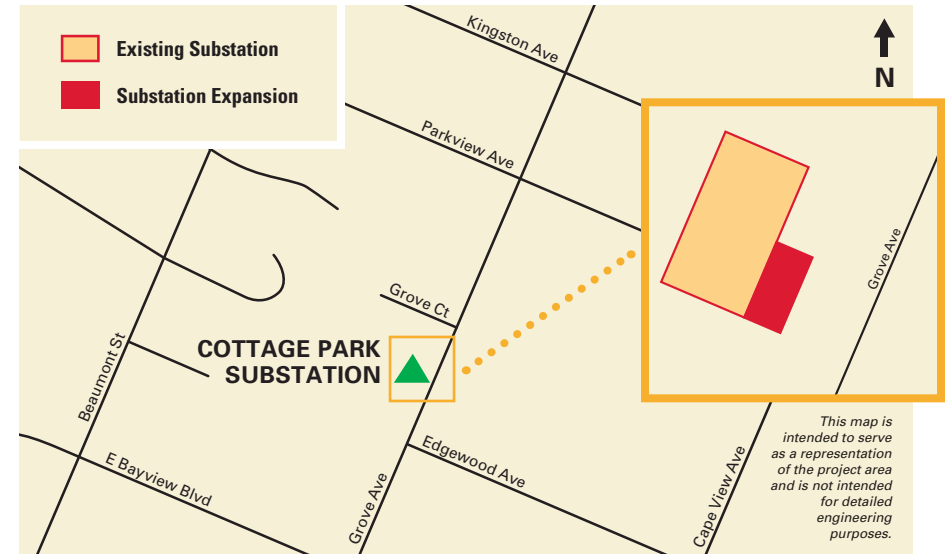

manhole investigation. Any holes will be refilled after surveying is complete.

Construction activities at Cottage Park Substation are planned between fall 2023 and spring 2024, after all necessary permits and approvals are received.

We will continue to update you as activities progress. Thank you for your understanding as we work to enhance electrical reliability in your community.
