Upcoming grid transformation work in your community

Hollin Hall Substation Grid Transformation Project

At Dominion Energy, we are committed to providing information on projects in your community. You are receiving this postcard because we are preparing to update equipment at Hollin Hall Substation in Fairfax County, Virginia.

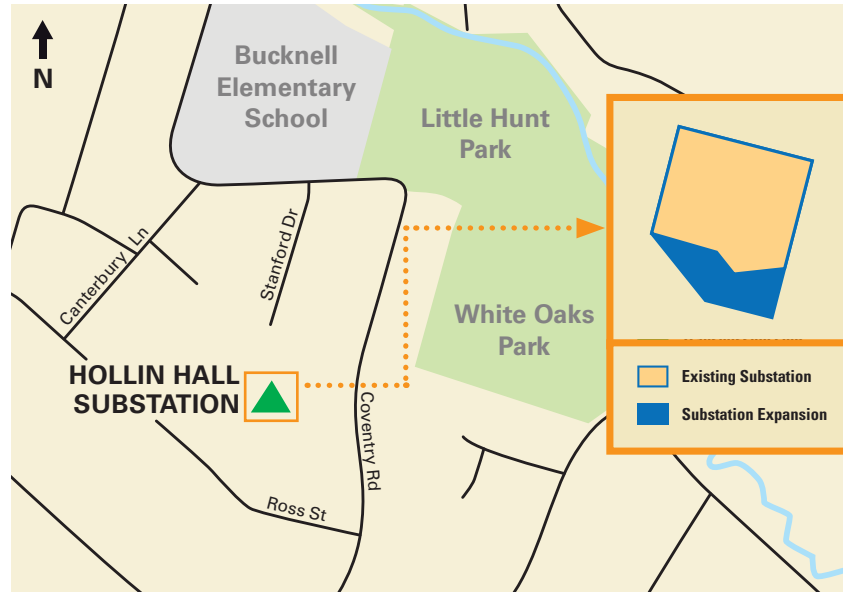

To create a more modern grid and enable successful integration of renewable energy resources, we are preparing to replace equipment originally installed in the 1950s at Hollin Hall Substation. The substation footprint will expand to the south to accommodate this new equipment. All improvements will be on existing Dominion Energy property located off Ross Street.

MORE

We are pursuing permits for this project and plan to begin substation construction in late 2025 or early 2026. We expect to complete construction in spring 2026.

Thank you for your patience as we prepare for this project. We will continue to update you on our activities.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
