## Metcalfe Substation Grid Transformation Project

At Dominion Energy, we are committed to providing safe, reliable, and affordable electricity to the communities we serve. You are receiving this postcard because we are preparing to upgrade technology at Metcalfe Substation in Emporia, Virginia.

TO LEARN  
MORE

We are planning to update equipment originally installed in the 1970s to create a more modern grid and enable successful integration of renewable energy resources. To accommodate new equipment and technologies, we need to expand the substation footprint by approximately 60 by 140 feet on existing Dominion Energy property.

After all necessary permits and approvals are received, we anticipate construction activities beginning in summer 2024 and lasting through December 2024. You will see increased activity during this time, but we will be mindful of our presence and work to reduce impacts to neighbors.

We will update you as activities progress. We appreciate your patience and understanding as we work to enhance reliability in your community.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at [powerlines101.dominionenergy.com](https://powerlines101.dominionenergy.com).
