MORE

In order to protect electric infrastructure and ensure reliable service for our customers, the existing chain link fence with barbed wire will be replaced by a taller fence without barbed wire. We will install additional security technologies to better deter, detect, delay, and monitor potential threats. During construction, a temporary fence will be installed, which may impact some of the existing vegetation onsite.

We anticipate construction will begin in mid-2025 and last for about six months, pending any delays due to weather or permitting. We do not anticipate any interruptions to your electric service due to this project.

Thank you for your patience as we work to increase the safety and reliability of your electric service.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at [powerlines101.dominionenergy.com](https://powerlines101.dominionenergy.com).
