

Dominion Energy
Voltage Optimization Program
(Part of our Grid Transformation Plan)

Sorry We Missed You

Date: _____

Work Request #: _____

We were at your property today:

- To perform the work required to proceed with an equipment upgrade in your area.** We just wanted to let you know we were here and will communicate with you throughout this project.

- To discuss work that will be necessary on your property.** Please contact us to schedule a follow-up meeting.

Contact: _____

Phone: _____

Thank you for your cooperation as we move forward with our grid modernization efforts.

Voltage Optimization Program

The Voltage Optimization Program is a Demand Side Management initiative and a crucial part of Dominion Energy's Grid Transformation Plan. The program strives to optimize voltage levels to reduce energy consumption for most customers.

Our target is to achieve an average 1% energy savings system wide. This will help us meet the energy standards established in the Virginia Clean Economy Act.
