Aviator 230 kV Substation and Electric Transmission Line Project

AT DOMINION ENERGY, we are committed to providing updates on our projects in your community. In August, we expect construction activities to begin on a new 230 kilovolt

(kV) substation and transmission line, as authorized by the State Corporation Commission (SCC). The new infrastructure, called Aviator Substation, will serve increased energy needs in eastern Loudoun County, Virginia, and will improve electric reliability for all customers in the area.

We will connect Aviator Substation to our existing Poland Road Substation with a new 230 kV double-circuit transmission line

AT DOMINION ENERGY, protecting the grid and making it secure against natural and man-made acts is a top priority. We work alongside government officials to prepare for potential incidents that could affect our ability to provide electricity safely and reliably to the communities we serve. Learn how we're keeping you safe at powerlines101.dominionenergy.com.

loop. Neighbors may hear permitted construction-related noise while we install transmission poles. Construction vehicles may use Willard Road to reach the work site.

We expect to finish construction by the end of 2024.

Thank you for your patience as we complete this important reliability project.
