MORE

In late fall 2023, we completed rebuilding approximately 37-miles of the existing transmission line between our Bristers Substation in Fauquier County and Ladysmith Substation in Caroline County, Virginia. In late fall 2024, we completed restoration activities. To ensure continued reliability of the transmission line, vegetation will be regularly maintained by trimming, pruning, and/or applying targeted, low-volume amounts of herbicides approved by the Environmental Protection Agency.

We appreciate your patience as we worked to complete this important project.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

PROJECT DETAILS

- Replaced aging infrastructure
- Maintained current right of way
- Complied with safety and reliability standards
