Bristers-Minnieville Transmission Line Rebuild Project

AT DOMINION ENERGY, we are committed to providing the latest information on projects in the communities we serve.

On August 3, 2022, we filed an application with the Virginia State Corporation Commission (SCC) to rebuild a 115 kilovolt (kV) electric transmission line between Bristers and Minnieville substations. This project will maintain safe and reliable electric service and comply with mandatory federal standards.

On April 24, 2023, the SCC issued its final order and approved the project. We will replace the aging infrastructure with higher voltage wire and taller structures. No new right of way is needed.

In the coming months, you may see crews and contractors in the right of way corridor conducting surveys to prepare for construction that will begin in late 2024. We will host a pre-construction meeting where you will have the opportunity to ask questions and engage with our team. We will continue to update you as the project progresses.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

AT DOMINION ENERGY, protecting the grid and making it secure against natural and man-made acts is a top priority. We work alongside government officials to prepare for potential incidents that could affect our ability to provide electricity safely and reliably to the communities we serve. Learn how we're keeping you safe at powerlines101.dominionenergy.com.
