Buena Vista-Balcony Falls 115 kV Electric Transmission Line Rebuild Project

At Dominion Energy, we are committed to providing the latest information on projects in the communities we serve. You are receiving this postcard because we would like to provide an update on the Buena Vista to Balcony Falls 115 kilovolt (kV) Electric Transmission Line Rebuild Project.

After decades of service, the structures are near the end of their service life and need to be replaced to maintain reliability and safety standards. We are proposing to replace the current lattice tower structures primarily with new, weathering steel H-Frame structures that are brown in color, and weathering steel monopole structures in certain locations. This project will rebuild approximately 10 miles of the electric transmission line between our Buena Vista and Balcony Falls substations in the City of Buena Vista and Rockbridge County, Virginia.

Construction is tentatively scheduled to begin in late summer 2024. During the coming weeks you can expect to see our crews on foot or in vehicles in the right of way or accessing roads outside the right of way.

This project is not expected to impact the quality of your electric service. Please know that we are dedicated to working safely and courteously in your community, and we will continue to update you on the project as it progresses.
