MORE

As you may recall, we are rebuilding approximately 10 miles of the electric transmission line between our Buena Vista and Balcony Falls substations in the City of Buena Vista and Rockbridge County, Virginia. We are replacing the current lattice tower structures primarily with new, weathering steel H-Frame structures that are brown in color, and weathering steel monopole structures in certain locations. We are currently in construction on Phase One of the transmission line between Balcony Falls and James Lee substations.

Construction on the remainder of the line, from James Lee to Buena Vista substations, was originally expected to begin in late spring 2025. We now tentatively plan to begin construction on this phase in late fall 2025. We still expect to complete Phase Two on schedule in late summer 2026. The decision to reschedule this work will not impact the quality of your service.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at [powerlines101.dominionenergy.com](https://powerlines101.dominionenergy.com).

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

## PROJECT TIMELINE

**Phase 1 – Balcony Falls to James Lee**  
Construction:  
Late summer 2024 – Late summer 2025  
Restoration of work area: 2025

**Phase 2 – James Lee to Buena Vista**  
Construction:  
Late Summer 2025 – Late Summer 2026  
Restoration of work area: Late 2026
