Buena Vista-Balcony Falls 115 kV Electric Transmission Rebuild Project – Soil Boring

AT DOMINION ENERGY, we are committed to providing safe, reliable, and affordable electricity to our neighbors. You are receiving this postcard because we would like to provide an update on the Buena Vista-Balcony Falls 115 kilovolt (kV) Electric Transmission Line Rebuild Project.

Throughout the next few weeks, you may notice our crews or contractors accessing properties along the right of way corridor to complete soil borings.

At Dominion Energy, we know many of our customers are facing challenges due to the COVID-19 pandemic. We're here to help. In accordance with the law recently passed in Virginia, we're offering flexible payment arrangements up to 24 months. To set up a payment plan, or view additional assistance options, please visit DominionEnergy.com or call 1-866-366-4357.

The soil boring process involves using heavy equipment to drill holes, sample the soil, and assess its makeup. Soil borings help ensure future foundations will provide adequate stability for transmission structures. The holes will be refilled after testing is complete.

We do not anticipate any interruptions to your electric service due to this project. In addition, we are mindful of our activities and maintaining property owner interactions with the appropriate social distancing.

We will continue to update you as activities progress. Thank you for your patience and understanding as we work to complete this important project.
