Carolina to S. Justice Branch Junction 115 kV / Partial 230 kV Electric Transmission Line Rebuild

At Dominion Energy, we are committed to providing the reliable, affordable, and increasingly clean energy that powers our customers every day. You are receiving this postcard because we are preparing to rebuild an aging electric transmission line in Halifax County, North Carolina. After more than six decades of dependable service, the structures and components are at the end of their service life. Rebuilding this line will ensure safe and reliable service for future decades. This project is one of several rebuilds which will occur in the corridor between Roanoke Rapids and Rocky Mount throughout late 2026.

MORE

The Carolina to S. Justice Branch Junction 115 kilovolt (kV)/Partial 230 kV Electric Transmission Line Rebuild Project is located between the City of Roanoke Rapids and approximately three miles northwest of the Town of Enfield. Most of the 17.7-mile project will rebuild a 115 kilovolt (kV) single-circuit line with weathering steel H-frame structures. Portions of the line will share structures with a 230 kV line that will be rebuilt with weathering steel monopoles.

Thank you for your patience while we complete these important reliability projects.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

HUNTING SAFETY:

During firearms hunting seasons, we remind you that our crews work in and near the right of way where hunters may be active. Our crews wear high-visibility work vests. Please share this information with any hunters on your property to help maintain a safe working environment.
