Chesterfield-Hopewell Electric Transmission Rebuild Project

AT DOMINION ENERGY, we would like to provide an update to the Chesterfield-Hopewell 230 kilovolt (kV) Electric Transmission Rebuild Project. In August 2019, our crews started preconstruction work. These activities include building temporary access roads to ingress and egress the right of way corridor, laying wooden matting to protect the corridor and conducting surveying before actual construction takes place.

In September 2019, construction will begin in Hopewell, working north toward Chesterfield. During this time, you may notice periods of inactivity between different phases of the project, which generally consist of:

- Foundation installation
- Assembly and installation of new structures
- Wire stringing
- Removal of old structures
- Rehabilitation of the right of way corridor to its pre-existing condition

Project completion is scheduled for May 2020. Thank you for your understanding and patience as we work to maintain reliable electricity in your area.
