Clark-Idylwood Electric Transmission Reconductor Project

At Dominion Energy, we are committed to sharing information on projects in the communities we serve. We are preparing to replace the wires, or reconductor, a four-mile transmission line between Clark and Idylwood substations in Fairfax County, Virginia. This project is important to meet the region's growing energy needs.

This 230 kilovolt line parallels the Washington & Old Dominion Trail. For the safety of trail users and our crews, we will temporarily reroute trail traffic on portions of the trail. Directional signage for the approved detour will be posted.

Prior to construction activities, we are pursuing permits and coordinating with relevant agencies and localities. As we prepare for construction, you may notice our crews and contractors in the project area. Detailed detour information will be posted to the project webpage as it becomes available.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.
