Evergreen Mills 230 kV Electric Transmission Project

At Dominion Energy, we are committed to continually reviewing and analyzing our energy infrastructure to provide safe, reliable electricity to our neighbors. To meet the area's increased load demand, we are proposing to co-locate new electric transmission powerlines along an existing corridor west of Dulles Airport. This project will improve grid reliability, enhance operational flexibility, and maintain compliance with federal standards.

The Evergreen Mills 230 kilovolt (kV) Electric Transmission Project proposes to build a short double circuit 230 kV transmission circuit in an existing right of way in eastern Loudoun County.

- The existing right of way and substation were constructed 5 years ago.
- Current infrastructure was built to bring in bulk electricity and support rapid growth in electrical demand in Loudoun County.
- Construction of the proposed transmission line would begin in 2025.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
