Fredericksburg-Possum Point 230 kV Electric Transmission Line Rebuild

At Dominion Energy, we are committed to providing the latest information on projects in the communities we serve. You are receiving this postcard because we are preparing to conduct surveys for the proposed Fredericksburg-Possum Point 230 kilovolt (kV) Electric Transmission Line Rebuild Project. This project will rebuild the existing transmission line between our Fredericksburg and Possum Point substations. The line spans the City of Fredericksburg, Stafford County, and Prince William County. To comply with the Endangered Species Act and the United States Fish and Wildlife Service guidelines, we will conduct wildlife surveys along the right of way corridor. Our crews will also survey for encroachments. This activity will begin in the next few weeks and may continue through the fall.

MORE

During this survey activity, you may see Dominion Energy and/or contractors and equipment near your property and in the transmission right of way. If our crews need to utilize your property to access the right of way, they will come to your door and attempt to speak with you first.

Thank you for your patience and understanding while we conduct critical work to maintain a safe and reliable electric grid.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
