## Fudge Hollow-Low Moor 138 kV Electric Transmission Rebuild Project

Use your iPhone camera or the QR reader app on other smartphones to visit the project page on our website.

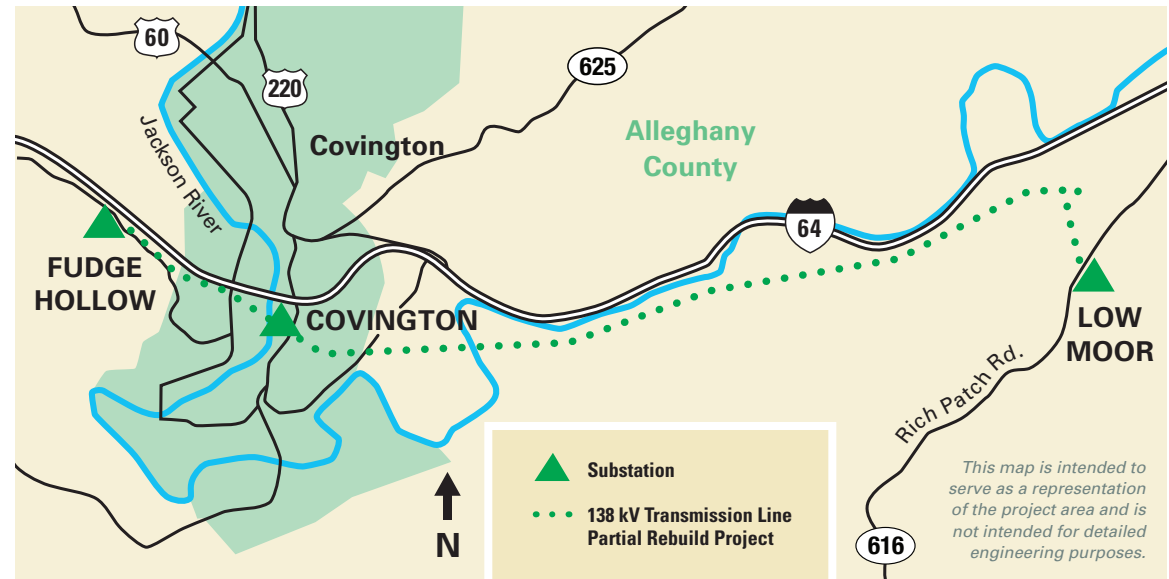

AT DOMINION ENERGY, we are committed to working safely and courteously on your property. You are receiving this postcard because we would like to provide an update on the Fudge Hollow-Low Moor 138 kilovolt (kV) Electric Transmission Line Rebuild Project.

We are pleased to announce that phase 1 of the project is complete between our Fudge Hollow and Covington substations. Phase 2 work from our Covington to Low Moor substations will continue through March 2021. After line construction is complete, access road removal and right of way restoration will begin and continue into 2021.

We will continue to keep you updated as construction activities progress. In addition, we want to remind you that we are mindful of our activities and maintaining property owner interactions with the appropriate social distancing. The work we do is integral to maintaining grid reliability and our crews will continue to perform work as needed to provide reliable energy.

Thank you for your patience and understanding as we work to complete this important project.
