Ironbridge Substation

At Dominion Energy, we are committed to providing the latest information on projects in the communities we serve. You are receiving this postcard because we are preparing to expand our Ironbridge Substation, located near Iron Bridge Road in Chesterfield County, Virginia.

MORE

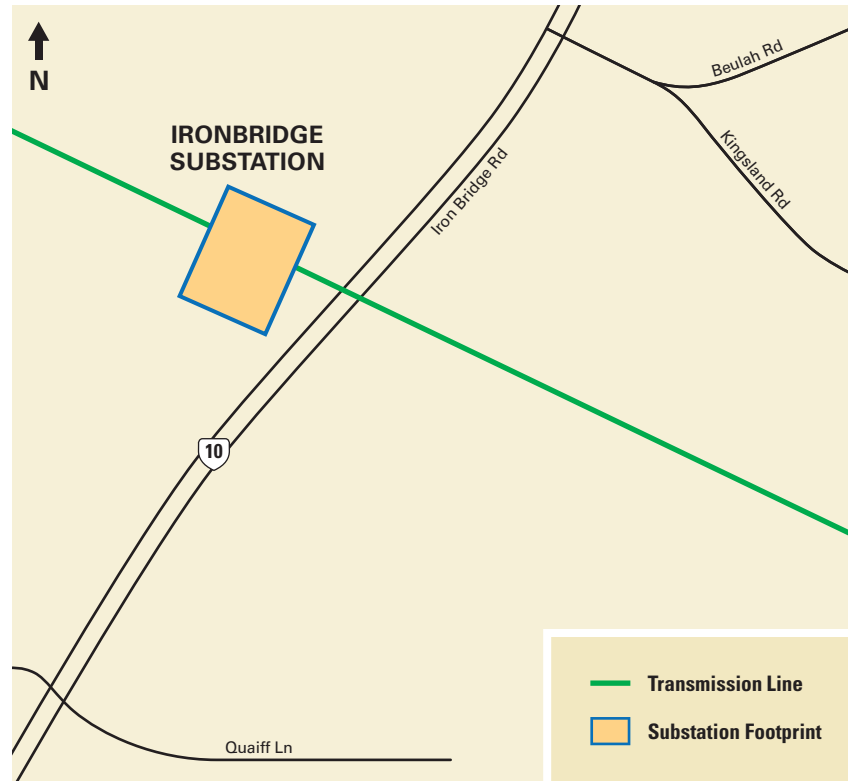

In order to maintain safe and reliable electric service in your area, we will install new equipment inside the substation and expand the substation adjacent to the current footprint on Dominion Energy owned property.

We do not expect this project to interrupt your electric service. Pending all necessary permits and approvals, construction is tentatively scheduled to begin in late 2026 and expected to conclude in early 2027.

To learn more about this upcoming work, we invite you to join us for a virtual community meeting. During the meeting, you will have the opportunity to learn more about the project and have your questions answered by our team.

We are dedicated to working safely and courteously in your community. Thank you for your patience as we complete this important project.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.
