Langley 230 kV Substation Project

AT DOMINION ENERGY, we are committed to providing project updates to the communities we serve. You are receiving this postcard to update you on our proposed new 230 kilovolt (kV) Langley Substation next to our existing Peninsula Substation in the City of Hampton, Virginia. This project will improve electric reliability and resiliency for area residential and commercial customers.

We surveyed the area in winter and held a public open house in spring. The permitting process is ongoing. Once we receive necessary approvals, we anticipate construction will take approximately two years.

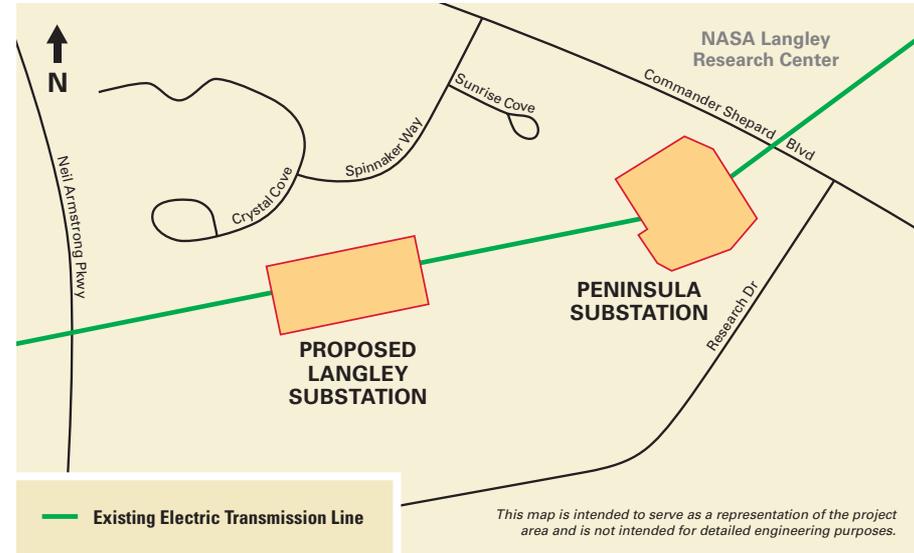

PROPOSED LANGLEY SUBSTATION PROJECT SUMMARY:

- Site area ~1.9 acres
- Within existing 350-foot wide right of way
- Similar appearance to Peninsula Substation
- Rebuild short portions (0.1 to 0.4 miles) of the existing 115 kV and 230 kV electric transmission lines
- New transmission line structures will be weathering steel monopole and three-pole structures

Your electric service is not expected to be interrupted as a result of this project. We will continue to update you as activities progress. Thank you for your patience and understanding as we work to complete this important reliability project.
