## Belmont to Beaumeade 230 kV Reconductor Project

AT DOMINION ENERGY, we are committed to continually reviewing and analyzing our energy infrastructure to provide safe, reliable electricity to our neighbors.

You are receiving this postcard because we are currently preparing to rebuild an electric transmission line along the W&OD Trail between our Beaumeade and Pleasant View substations in Loudoun County, Virginia. This project also includes work near Bolen Memorial Park where we will replace aging lattice structures with new, steel double-circuit monopoles and one single-circuit structure.

At Dominion Energy, we know many of our customers are facing challenges due to the COVID-19 pandemic. We're here to help. In accordance with the law recently passed in Virginia, we're offering flexible payment arrangements up to 24 months. To set up a payment plan, or view additional assistance options, please visit [DominionEnergy.com](https://www.dominionenergy.com) or call 1-866-366-4357.

Throughout the coming weeks, you may see personnel on foot entering the right of way. Field access work may include wetlands delineation in which the crews may also need to hand-place boundary flags for temporary identification marker only and obtain small soil and/or vegetation samples. In the wake of ongoing public health concerns from the spread of the coronavirus, we are mindful of our activities and will maintain proper social distancing.

Additional information can be found on the project website at [DominionEnergy.com/belmont](https://www.dominionenergy.com/belmont).

Please know that we are dedicated to working safely and courteously in your community and we will continue to keep you updated on our progress.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.
