## Clubhouse to Lakeview 230 kV Electric Transmission Line Rebuild Project

AT DOMINION ENERGY, we are committed to continually reviewing and analyzing our energy infrastructure that provides safe, reliable, and affordable electricity to the communities we serve. You are receiving this postcard because we are preparing to rebuild a 230 kilovolt (kV) electric transmission line between our Clubhouse Substation in Greensville County, Virginia and our Lakeview Substation in Halifax County, North Carolina. This project is necessary to maintain reliable service for our customers.

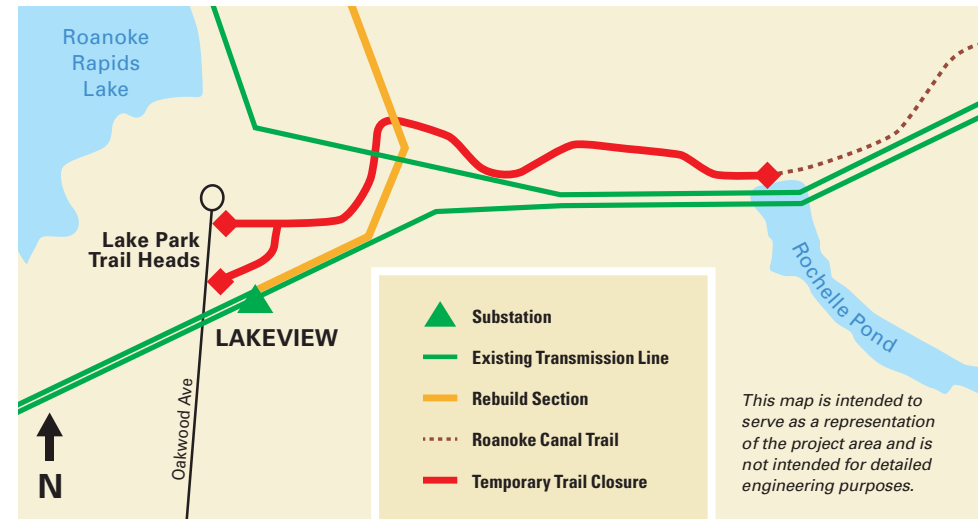

As part of our pre-construction work, we need to remove danger trees located near the transmission line. Danger trees are trees outside the right of way that have the potential to fall within 10 feet of the transmission wire or structures. Trees and tree limbs that come in contact with electrical lines are a leading cause of power outages, especially during storms. The removal of danger trees is necessary to help prevent large-scale outages.

Danger tree work is expected to take approximately six weeks, lasting from late August into early October 2022 along a portion of the Roanoke Canal Trail near Roanoke Rapids Lake. The trail will be closed between the Trail Head and Rochelle Pond throughout this forestry work. The trail will not reopen until the work is complete. Barricades and closure signs will be posted, and trail users are encouraged to use alternate parking and trail access at the Roanoke Canal Museum. Please maintain a safe distance from work zones for your protection and to allow our crews to work safely.

Please know that we are dedicated to working safely and courteously in your community. Thank you for your patience while we perform this important work.

## CONTACT US

Visit our website at [DominionEnergy.com/line254](https://www.dominionenergy.com/line254) for project updates. Or contact us by sending an email to [powerline@dominionenergy.com](mailto:powerline@dominionenergy.com) or calling 888-291-0190.

AT DOMINION ENERGY, protecting the grid and making it secure against natural and man-made acts is a top priority. We work alongside government officials to prepare for potential incidents that could affect our ability to provide electricity safely and reliably to the communities we serve.
