We are Working in Your Community

Loudoun – Ox 230 kV Partial Rebuild Project

At Dominion Energy, we are committed to providing the reliable, affordable, and increasingly clean energy that powers your every day. We are reaching out to you to inform you of some upcoming line work done via helicopter.

MORE

For the final phase of the Loudoun-Ox project, a non-Dominion Energy helicopter will be used to install transmission lines. The work will take place between NOVEC Substation in Clifton and Ox Substation in Fairfax Station, Virginia.

Line pulls will occur intermittently between sun up and sundown from Monday, December 9 through Saturday, December 21. To ensure everyone's safety, traffic control and safety structures will be in place when the helicopter pulls lines over the road.

For our neighbors who reside in close proximity to the work zone — we respectfully remind you to remain outside the right of way during helicopter work. Safety is our highest priority, and this is an active construction zone.

Flights are weather-dependent and subject to change. We appreciate your patience while we complete this work as quickly and efficiently as possible. We expect to finish construction in this section in December 2024, and we will restore the right of way in the spring of 2025. Please do not hesitate to connect with us if you have questions.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.
