Lynnhaven – Virginia Beach Fiber Project

At Dominion Energy, we are committed to providing the reliable, affordable, and increasingly clean energy that powers our customers every day. You are receiving this postcard because we are preparing to install fiber on an existing electric transmission line between our Lynnhaven and Virginia Beach substations located in the City of Virginia Beach, Virginia. This project will improve our communications between substations and protect the transmission lines from lightning strikes. This protection provides the necessary resiliency, dependability, and security to operate and monitor the bulk power system.

This winter, the existing monopoles will be modified slightly to support the new fiber's weight. In February and March 2024, we will prepare access to the electric transmission line structures. Fiber installation is expected to occur in April and May 2024. After completing our work, we will restore the right of way in summer 2024.

Your electric service is not expected to be interrupted as a result of this project. Thank you for your patience and understanding as we complete this important project.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

UPCOMING WORK

FEBRUARY – MARCH 2024

Preconstruction activities

APRIL – MAY 2024

Install fiber

SUMMER 2024

Restoration of right of way
