Mt. Storm-Valley 500 kV Electric Transmission Rebuild Project

Use your iPhone camera or the QR reader app on other smartphones to visit the project page on our website.

AT DOMINION ENERGY, we are committed to working safely and courteously in the communities we serve. You are receiving this postcard because we want to provide an update on the Mt. Storm-Valley 500 kilovolt (kV) Electric Transmission Line Rebuild Project in Virginia and West Virginia.

With firearms deer season set to begin, we would like to remind you that our crews are currently working in and near the right of way. The right of way is located near remote, wooded areas where hunters may be active. Our crews will be wearing high-visibility work vests so they are easy to see. If anyone hunts on your property, please share this information with them to help maintain a safe working environment.

Thank you for your patience and understanding as we work to complete this important project.

In addition, we want to inform you that in the wake of ongoing public health concerns from the spread of the coronavirus, we are mindful of our activities and maintaining property owner interactions with the appropriate social distancing. The work we do is integral to maintaining grid reliability and our crews will continue to perform work as needed to provide reliable energy.
