Mt. Storm-Valley 500 kilovolt Rebuild Project

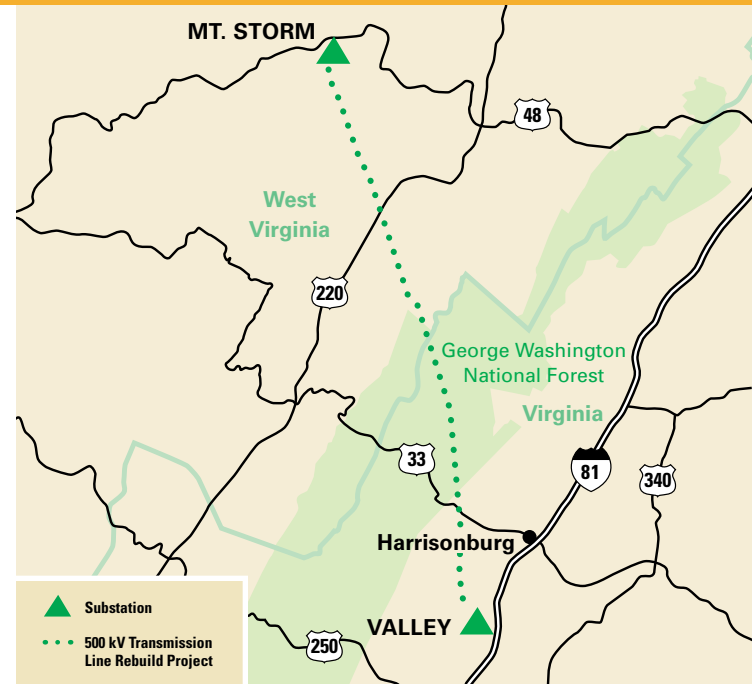

AT DOMINION ENERGY, we are committed to continually reviewing and analyzing our energy infrastructure to provide the most safe and reliable electric service. We are currently preparing to address an aging electric transmission line located near your property. The line needs to be replaced to maintain reliability for our customers.

As part of our preparations, land surveying needs to take place to complete our preliminary design plans. Crews will be accessing the right of way corridor on or near your property in the coming weeks and months to perform this work.

Please know we are dedicated to working safely and courteously in your community. We will continue to keep you updated as activities progress.
