## New Road – Middleburg Electric Transmission Line Rebuild

Use your iPhone camera or the QR reader app on other smartphones to visit the project page on our website.

AT DOMINION ENERGY, we are committed to working safely and courteously on or near your property. You are receiving this postcard because we want to provide an update on the New Road – Middleburg 115 kV Electric Transmission Line Rebuild Project in Prince William, Fauquier, and Loudoun counties, Virginia.

Restoration of the project area is underway. Our crews have removed much of the line construction equipment and temporary transmission line conductor and poles from the right of way. Our goal is for crews to remove the temporary wooden matting access roads in early spring 2022. This will be

followed by overseeding and basic restoration of the original land contours. Monitoring of the restored areas will continue through late spring.

Thank you for your patience and understanding for the duration of this project. This work is an important part of our commitment to provide safe, reliable, and affordable electric service to the communities we serve.

We will continue to be mindful of our activities and maintain property owner interactions with

the appropriate social distancing. The work we do is integral to maintaining grid reliability and our crews will continue to perform work as needed to provide reliable energy.

### CONTACT US

Visit our website at [DominionEnergy.com/projects-and-facilities/electric-projects/power-line-projects/new-road-middleburg](https://www.dominionenergy.com/projects-and-facilities/electric-projects/power-line-projects/new-road-middleburg) for project updates.
