Aviator to Takeoff 230 kV Electric Transmission and Substation Project

At Dominion Energy, we are committed to continually reviewing and analyzing our energy infrastructure to provide safe, reliable electricity to our neighbors. To meet the area's increased load demand, we are upgrading the 230 kV transmission network around Chantilly, Virginia. This project will improve grid reliability, enhance operational flexibility, and maintain compliance with federal standards.

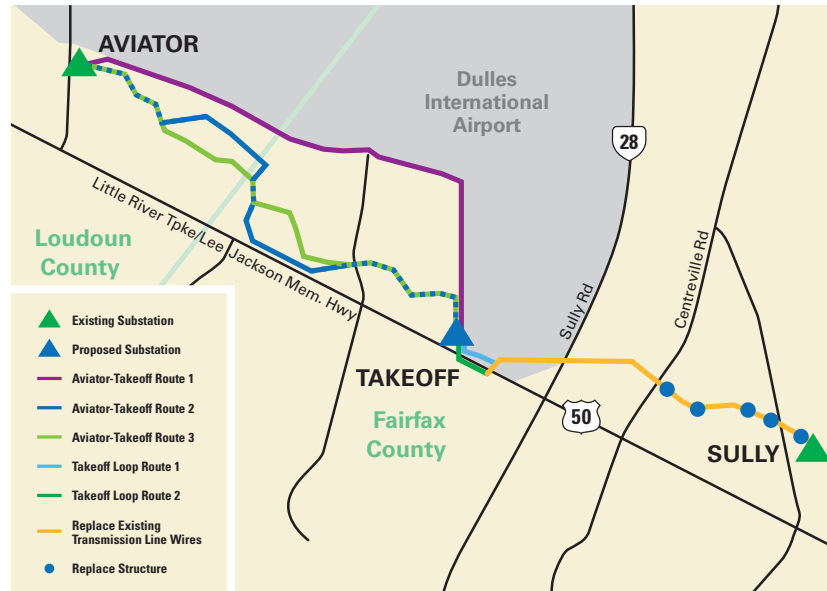

The Aviator to Takeoff 230 kilovolt (kV) Electric Transmission and Substation Project consists of these components:

- Construct the new Takeoff Substation.
- Construct a new 0.3-mile-long right of way corridor with two double-circuit 230 kV lines to connect Takeoff Substation to the electric grid.
- Construct a new 3.2-mile-long right of way corridor with one double-circuit 230 kV line to connect the newly constructed Aviator Substation to Takeoff Substation.
- Replace wires on approximately 2 miles of existing 230 kV electric transmission lines and replace five structures.

You are invited to join the community meeting to learn more. **There will be no formal presentation**; project team members will be on hand to answer your questions. Your participation is crucial in developing these projects, so please feel free to join us at any time from 5:30 p.m. to 7:30 p.m.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

MEETING DETAILS

Thursday, June 6, 2024
5:30 p.m. – 7:30 p.m.

Rajdhani Mandir
4525 Pleasant Valley Road
Chantilly, VA 20151

*There is no formal presentation;
stop by anytime during the meeting.*
