

November 22, 2024

Dear Neighbor:

At Dominion Energy, we remain committed to providing safe, affordable and increasingly clean electricity – that’s OUR promise to you.

Since 2022, we have worked with eastern Loudoun County residents to plan electric transmission infrastructure projects. These important projects are designed to bring bulk electricity into the Ashburn area, otherwise known as Data Center Alley.

Data centers are a critical industry, and data has become essential to our economy and everyday lives. Dominion Energy’s infrastructure investments will provide reliable power for data centers while enhancing the local electric grid and improving reliability for all our customers. The Golden to Mars 500-230 kV Electric Transmission Project is an important final piece to an electric transmission loop through Ashburn where the demand for energy is greatest. To view the Loudoun Reliability Project map please visit DominionEnergy.com/NOVA and click on the GeoVoice interactive mapping tool.

Since meeting with the community earlier this year, we’ve been working to refine routes for this project. We’ve been able to make modest changes to overhead routes and have continued to study the feasibility of placing these circuits underground. We look forward to sharing these updates with you during our upcoming community meetings.

Your input and continued involvement are important to the development of this project as we consider all routing options.

We will host two opportunities for you to join the conversation:

Virtual Meeting	In-person Meeting
<ul style="list-style-type: none">• Tuesday, January 14, 2025• 12 p.m. – 1 p.m.• Link will be available on project website: www.dominionenergy.com/nova	<ul style="list-style-type: none">• Wednesday, January 15, 2024• 5:30 p.m. – 7:30 p.m. <p>The Lodge at Hanson Park 23394 Endeavor Drive Aldie, VA 20105</p> <p>*A formal presentation will be provided at 6PM.</p>

Please plan to join us in-person or online for this important discussion. Our project team will be available to gather feedback and to answer your questions. We look forward to your attendance.

Sincerely,

The Electric Transmission Project Team
