Norris Bridge Electric Transmission Line Project Update

Greys Point Transition Station Community Meeting

On Dec. 21, 2017, Dominion Energy received approval to rebuild the portion of the existing power line that crosses the Rappahannock River with an underwater transmission line. As part of this project, two stations need to be built to transition the overhead line to underground. We have submitted a site plan application for our new Greys Point Transition Station to Middlesex County for review. A similar station will be built in Lancaster County.

To learn more about the plans for the Greys Point Transition Station, including the site layout and landscaping, please visit us at our construction informational meeting.

The Middlesex County Planning Commission will review our application on Thursday, Aug. 9, at 7 p.m. This meeting is open to the public.

Thank you for your interest in this project and your patience as we continue our preconstruction planning.
