## UPDATE

# Rappahannock River Crossing Underwater Electric Transmission Line Project

(formerly known as the Norris Bridge Electric Transmission Rebuild Project)

## Rappahannock Transition Station Community Meeting

On Dec. 21, 2017, Dominion Energy received approval to rebuild the portion of the existing power line that crosses the Rappahannock River with an underwater transmission line. This project, formerly known as the Norris Bridge Electric Transmission Rebuild Project, requires two stations to be built to transition the overhead line to underground.

We have submitted a site plan application for our new Rappahannock Transition Station in Lancaster County. A plan for a similar station across the river in Middlesex County, Greys Point Transition Station, has been submitted and is currently under review.

To learn more about the plans for the Rappahannock Transition Station, please visit us at our construction informational meeting.

The Lancaster County Board of Supervisors will review our application on Thursday, Aug. 30, 2018, at 7 p.m. This meeting is open to the public.
