project page on
our website.

AT DOMINION ENERGY, we would like to provide an update to the Rappahannock River Crossing Underwater Electric Transmission Line Project. We have received all necessary permits to begin construction on the project. Beginning early September 2019, we will start mobilizing our crews and equipment, clearing trees and grading. Subsequently, we will begin work on the underwater transmission line.

We invite you to attend our construction informational meeting to learn more about the construction process for this project. There will be no formal presentation, but our electric transmission subject matter experts will be on hand to provide information and answer any questions you may have.

Thank you for your patience as we work to maintain reliable electricity in your community.
